# German states reject tax plans

MONDAY MAY 13 1996

By Peter Norman in Schloss Krickenbeck and Andrew Fisher in Frankfurt

Reforms are opposed by all 16 premiers as Germany's programme to boost growth throngh spending cuts, welfare restructuring and tax changes ran into fresh trouble yesterday when the prime minis-ters of the 16 federal states or Länder rejected Bonn's tax plans as one-sided and unfair.

In a statement that crossed party lines, state leaders from the opposition Social Democratic party (SPD), Chancellor Helmut Kohl's Chriatian Democratic Union and the CDU's Bavarian sister party, the Christian Social Union, said the tax plans for 1997 onwards would ease the burdens of the federal government at the expense of the Länder and local authorities.

The statement, issued after a special two-day meeting, spoke of a "dramatic deterioration" in Germany's public finances. It waa issued as Mr Kohl

Bonn battles to promote growth package appealed to trade unions to avoid conflict after a weekend of warnminister, will have to revise his proposals if he is to secure their passage through the Bundesrat, iogs by union leaders of wide-

spread industrial action over the government's proposals. Mr Dieter Schulte, head of the Gerstates. man trade union federation (DGB), warned of "a hot sum-mer" of industrial action. Ms Heide Simonis, SPD prime

minister of Schleswig Holstein. who chaired yesterday's meeting of Lander leaders, insisted that the premiers were not creating a united front against the government's programme, which was decided last month and is intended to enhance employment and modernise the economy. But their unanimous objection

to the tax changes means Mr Theo Waigel, the German finance

the second chamber of the Bonn parliament, which represents the

> The federal measures include plans to scrap wealth tax, reform inheritance tax and cut the "solidarity surcharge", used to help finance eastern Germany.

The premiers met against a background of growing financial crisis for Germany's federal and state governments and local authorities. Ms Simonis said federal, state and municipal revenues this year would be about DM25hn (\$16.4bn) below a forecast of October last year.

For next year, the three levels of government can expect reve-

nue shortfalls totalling DM71hn compared with estimates for 1997 published a year ago. The federal states expect a DM29bn reduction in revenues next year and the local authorities DM11hn, Ms Simonis said.

The revenue shortfalls will make it more difficult than before for Germany to qualify for European economic and mone tary union. Mr Kurt Biedenkopf, the CDU prime minister of Saxony, said meeting the Maastricht mean more budget cuts.

the federal government on the concrete measures needed to co-ordinate hudget deficits," he said.

Ms Simonis sain the state lead-ers supported a restructuring of Germany's social insurance systems and deep cuts in public spending. They agreed their finance ministers should prepare joint proposals for spending cuts to be discussed at a meeting with Ms Kohl on Iwa 12

Mr Kohl on June 13. in weekend speeches and inter-views, trade union leaders said industrial action against the government's plans could escalate quickly, affecting airports, data processing centres, transport, rubbish collection and other ser-

vices. The comments were a clear warning to employers ahead of today's third round of public sector wage talks in which unions are claiming a 4.5 per cent pay increase. The employers are seeking a two-year freeze as part of the government's budget savings

package.

## Lloyd's boosted by deal to halt US lawsuits

#### By Raiph Atkins in London

Lloyd's of London has made an important breakthrough in its attempt to head off legal action by US securities regulators.

Under a deal struck at the weekend in California, litigation which could have undermined the insurance market's recovery plan has been shelved.

The "standstill agreement" with the California Department of Corporations, the state's securities regulator, removed a threat against \$10bn held in trust to support US underwriting.

It also allows Lloyd's to resume contact with 500 Names in the state - previously blocked by the department. Lloyd's can now reopen negotiations on a possible ont-of-court settlement of compensation for losses.

The deal is a further fillip for Lloyd's which last week won broad support from Names individuals whose assets have traditionally supported the market - for a final, substantially improved, settlement offer worth £3.1bn (\$4.7bn).

At the same time, the extra cost to Names of Equitas -Lloyd's proposed rescue vehicle has fallen from £1.9bn to £1bn. Equitas will take responsibility for hillions of pounds of US asbestos and pollution-related liahilities.

Lloyd's had reached standstill agreements with securities regulators in 10 states, most recently

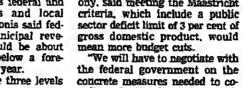

But California posed a problem because of the large number of Names in the state and the threat against the Lloyd's trust funds which could have hampered US trading. The securities regulators allege investment in Lloyd's was

Mr Peter Lane, Lloyd's North America managing director, said the block on communicating with Californian Names had led to "considerable misinformation". "We are now able to set the record straight with our Calif-ornia Names," he added. However, Lloyd's still faces problems caused by the intervention last week of the Securities

The management of Air France believes the state-owned carrier could be privatised as soon as the end of next year, or early 1995. This latest indication of the possible timing of a sell-off emerged last week as the com-pany prepared to unveil details of measures designed to improve the performance of Air France Europe, its domestic partner.

Mr Christian Blanc, Air France chairman, warned last month that Air France Europe would be insolvent in less than two years if nothing was done.

Vision of Algeria's future: Algerian president Liamine Zeroual outlined plans for a second cham-ber of parliament and a ban on parties using religion or ethnicity for political ends. Page 18

The proposals, to be unveiled on Wednesday, are expected to include a two-year pay freeze and shuttle services on important routes from next winter.

Air France Europe has been hard hit by increased competition from other French airlines since barriers were fully removed last year. Liberalisation will be further entrenched in April 1997 when airlines from other European Union countries are allowed unfettered access to the French domestic market.

Air France is also waiting to hear whether the European Commission will allow it to receive the third and final tranche of a FFr20bn (\$3.99hn) atate aid package. Other European airlines including Lufthansa and KLM, have complained that Air France is using state aid money to fund cuts in air fares.

It is almost three years since the French government included Air France - previously regarded as a sacred national institution on a list of 21 public sector companies earmarked for privatisation. The need for extensive restructuring, however, meant the airline was always expected to be among the last of these groups to be sold.

After cumulative losses of FFr15bn since 1991, the compa-ny's position is showing signs of improvement. It recently disclosed that it had reduced net losses before restructuring costs to less than FFr1.2bn in 1995-96. and hoped to cut this to FFr115m in 1996-97. The figures excluded

Air France Europe. A scheme under which about one-third of Air France's employees in early 1995 agreed to a reduction in salaries in return for shares in the company was based on a valuation of about FFr3.6bn for the airline. But analysts said at the time this was not a mean-ingful guide to a possible privatisation value. Employees must hold their shares until mid-1998. Mr René Monory, president of the French Senate, last month

urged the government to double its 1996 privatisation target to take advantage of the recent strength of the stock market.

moves to block BJP By Shiraz Sidhva in New Delhi

**India's Congress** 

party keeps Rao and

India's defeated Congress party yesterday unanimously re-elected caretaker prime minister P.V. Narasimha Rao as party leader and supported moves to form a coalition government to prevent Hindu nationalists taking power. Congress deputies instructed Mr Rao to open talks with the National Front-Left Front

(NF-LF), a coalition of centre-left and socialist parties. with a view to preventing the Hindu rightwing Bharatiya Janata party (BJP) taking power for the first time. The BJP emerged as the largest party in last week's gen-eral elections but fell short of an outright majority in a hung parliament.

Both the BJP and the NF-LF. have told President Shankar Dayal Sharma they will have euough support from allies to form a government. The presi-dent will decide which party is best capable of forming a government next week.

Politicians from all over the country converged on New Delhi yesterday to discuss the formation of a new government. The BJP and its allies have won 180 out of 514 seats for which results have been declared so far (results in 29 seats have yet to be declared, while polling

is yet to begin for seven more seats in Kashmir), making it the single largest party. But it will have to prove it has the support of nearly 100 more MPs to form a government. This may be diffi-cult as the BJP are political "untouchables" for most secular

CONTENTS

parties.

The NF-LF a combination of secular and regional parties, which has 99 seats, has also staked its claim to form a government. It is determined to keep the BJP out of government, and is hoping that Mr Rao's Congress party will support it. The NF-LF has said the BJP must be kept out of power at all costs because of its perceived hias against India's minorities, especially its 110m Moslems. The Congress party. which suf-

fered its worst defeat since 1947, with only 134 seats, apent the weekend trying to salvage its 111-year-old organisation from total disintegration. Mr Rao, who resigned as prime minister on Friday and was largely hlamed for the defeat, was re-elected the Congress parliamentary party head, contrary to rumours that he would face a further revolt within the party and a challenge to his leadership.

Mr K. Karunakaran, a senior Congress party leader, said the Congress would support the for-mation of a "secular" government to keep the BJP away from power. "The Congress party has decided that the new government will be made up of secular MPs," party spokesman Ved Prakash

Mr V.N. Gadgil, spokesman of the Congress, reiterated that the party would have "no truck with the BJP, because it was clear that 80 per cent of the people had voted for secular parties". He added that the party had yet to decide how exactly to ally with other like-minded parties.

## **NEWS:** EUROPE

# Rome presses on as northern clouds gather

By Robert Graham in Rome

The long process of forming a new Italian government in the wake of the April 21 general elections will be concluded this

Mr Romano Prodi, the Bologna economics professor, is expected to be sworn in as head of the country's first centre-left government on Saturday. At the weekend Mr Prodi named two close advisers who would be accompanying him to the prime minister's office at Palazzo Chigi. Several key ministers are already known. The incoming government

was given a rude reminder yes-terday of the most politically sensitive issue on the agenda. From the northern city of Mantua, Mr Umberto Bossi, leader of the populist Northern League, announced the formation of an 11-member government of Padania, accompanied hy a 10-strong-"Padania provisional liberation committee covering Emilia, Romagna, Lig-uria, Lombardy, Piedmont and the Veneto.

This defiant move hy Mr Bossi could cause more trouble for the League leader in the courts for subverting the institutions of state.

The Padania Government, headed hy Mr Giancarlo Pagliarini, a former hudget minister, can have no legal status within the Italian state; hut Mr Bossi made clear he intended lt to shadow the activity of the central government in tha short term, and had no specific The move underlined the dif-ficulties that Mr Prodi and his team face in defusing resent-ment in the north, especially the Veneto, against the central

interfere with its agenda. Formal consultations by sident Oscar Luigi Scalfaro on forming the new govern-ment will begin once the parties have agreed the composi-tion of all the parliamentary commissions and of tha voting groups in both the senate and chamber of deputies. The latter process is expected to be com-

plete hy mid-week. Mr Prodi has said be hopes that once asked to form a govarnment, ha will he ready within 48 hours. His economic team is expec

ted to be headed hy Mr Carlo Azeglio Clampi, the former

prime minister and long-time governor of the Bank of Italy, and to include Mr Beniamino Andreatta, an ex-Christian Democrat economist with extensive ministerial experi-ence, and Mr Vincenzo Visco, the economic spokesman for the Party of the Democratic Left (PDS).

The appointment of Mr Ciampi, even though he did not stand for parliament, has a dual purpose. It will give a strong signal on the government's commitment to Euro-pean integration and privatisation. and will halance the weight of Mr Lamberto Dini,

he outgoing premier, at the foreign ministry. Mr Dini has apparently heen denied his wish to he deputy premier under Mr Prodi. Mr Prodi has won a small

battle hy preventing the PDS from placing the PDS leader's closest political aide in the prime minister's office.

Over the weekend he announced that Mr Enrico Michel, director general of Iri, the state holding company which Mr Prodi twice headed would he in charge of the prime minister's office along with Mr Arturo Parisl, a Bolo-

The new pledge hy French and German leaders to quicken the pace of their co-operation, particularly on defence, meets its first test today when France unveils its military programme for the next five years.

At a working dinner in Bonn on Friday, President Chirac and Chancellor Kohl held "a detailed discussion on all aspects of defence and security policy", according to a German official who said the two leaders "agreed on all topics discussed". One aim of the dinner was for Mr Chirac to hrief Mr Kohl on

the 1997-2002 military programme, which will be endorsed hy the French cahinet and presented to parliament today. German ministers fear French cuts will bear heavily on France-German helicopter projects. A French official hinted, however, that Paris might seek to remedy some early cuts in future years.

The French government has already announced an overall annual cap of FFr185hn in 1995 francs for defence spending up to 2002, with equipment spending limited to FFr86bn of that amount. Mr Chirac and Mr Kohl agreed in Bonn to step up their consultations hy meeting on average every six weeks. They will next meet on June 5 for the Franco-German summit David Buchan, Paris

## Prague to revoke bank licence

The Czech National Bank will today revoke the banking licence of Prvni Slezska Banka (First Silesian Bank), the latest casualty of the crisis in the country's small bank sector, after what the central bank said were "shortfalls" in the troubled institution's activities.

The CNB, which has already intervened to save two other trouhled banks this year, said a hig state-controlled hank, Ceskoslovenska Obchodni Banka, would assume the liabilities of Prvni Slezská. CSOB is making compensation payments for, insured deposits from the resources of the Czech Deposit Insurance Fund and is also settling uninsured deposits. Prvni Slezska, based in Opava in the north-eastern region of

Silesia, has 3,000 customers and deposits of about Kclhn (\$36m), but its loan portfolio is understood to be considerably larger than its capital base. Vincent Boland, Pragu

### Czech telecoms meeting 'invalid'

SPT Telecom, the Czech national telephone operator, is to appeal against a court decision to declare invalid a shareholder meeting that was called to clear the way for last summer's sale of 27 per cent of the company to TelSource, a Dutch/Swiss consortium, for \$1.45bn.

The ruling, on Friday hy a Prague district commercial court, is a severe emharrassment for the Czech government. The court said the February 1995 meeting was invalid because the government did not have proper power of attorney over SPT's shares. The company was 74 per cent state-owned, with the rest held by domestic shareholders after coupon privatisation.

The case was brought by a group of those shareholders, angered at the exclusion of domestic bidders from the tender and at not being offered the opportunity to huy the new shares in the company issued to TelSource. Vincent Boland

The Socialist-Liberal coalition governmeot, which took office nearly two years ago, had loog promised to announce reform plans for the public finances and the coontry'a troubled

welfare system. one of the most extensive in the world. In particular, the state has faced mounting costs from health and pen-sions, which are run hy two semi-inde-

pendent funds that have required more than Ft200bn (\$1.4hn) - equivalent to about 3 per cent of annual gross domestic product - in bailouts in the past five

The International Monetary Fund delayed granting Hungary a new standhy loan until it acreed to limit the funds to a deficit of Ft17.8bn this year. In spite of last week's meeting and mooths of debate, the cabinet has yet to agree on many details of the planned reforms.

The government has privatised several of the country's largest companies, and last year introduced a tough austerity package.

But analysts say it must press ahead

with other unpopular siructural changes such as welfare reform this year before the ruling parties turn their attention to winning the 1998 general elections,

The cabinet alms to prepare legislation hy the autumn for a "three pillar" pension system for the under-tos - a minimum pension supplemented hy further payments based on individuals' cootributioos and voluntary, private pension funds, which have already begun to appear - which would take effect from 1998.

Those over 40 could choose to stay in the present system.

Mr Peter Medgyessy, the finance min-ister, said the new scheme would require a Ft70bn start-up loan but the chaoges were necessary to overcome the problems caused by Hungary's ageing population and the high cost of the present Scheme.

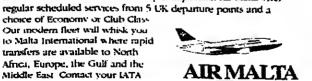

At present all those who have paid contributions for 20 years or more are eligible for a state pension based on their final year's salary.

Taxes and the level of compulsory cootributions are so high that relatively few Hungarians have had the resources to take out private penaions.

Mr Gyula Horn. Socialist prime minis-ter, pledged to reduce the highest income tax bracket, at present 48 per cent, and to restructure the tax system from next year.

The cabinet, which recently decided to eliminate 10.000 bospital beds, also allocated extra subsidies for medicing a) last week's meeting.

It deferred other decisions on health reforms until the autumn hut unveiled a new strategy for education, including a proposal to lift the minimum school leaving age to 18 and new training requirements for teachers.

The Philippines is seeking to persuade the six other mem-bers of the Association of South-East Asian Natious to extend unconditionally to the rest of the world tariff cuts which they have agreed to make on trade with each other. President Fidel Ramos hopes to win the support of his Asean partners for the idea in time for the next summit of the 18-member Asia-Pactfic Economic Co-operation forum, which he will host in Subic Bay in November.

would accelerate liberalisation of some of the world's fastest growing markets and increase > momentum behind Apec's plan to free trade and invest-ment in the Pacific rim region by the year 2020.

ging its feet."

Each Asean member has already agreed, as part of a free trade area plan, unilaterally to lower tariffs on trade with the others to an average of 5 per cent by 2003.

Mr Jesus Estanislao, senior Apec adviser to Mr Ramos. said his government now wanted the cuts extended to all trading partners on a Most Favoured Nation basis.

That would mean that Asean members would dismantle their trade barriers well ahead of the 2020 deadline set by Apec and even before 2010, when Apec's industrialised members are due to liberalise their markets fully.

WORLD TRADE NEWS DIGEST

If accepted, the initiative

Fidel Ramos: initiative out that by 2003 there will be little difference between the

Presenting a unilateral Asean initiative in November would not only bring the Phi-lippines political kudos for its leadership," said Professor Julius Ceasar Parreñas, trade policy adviser to the Philippine government. "It would also send a strong message to the rest of the world that developing countries are cutting tariffs of their own accord, at a time when much of the west is drag-

"talking point", is likely to arouse controversy. Singapore, which already has some of the lowest tariffs in Asia, is expected to be sympathetic, but Indonesia and Malaysia appear more sceptical.

Mrs Rafidah Aziz, Malaysia's trade minister, said her gov-ernment would consider the initiative seriously, but further study and discussion were needed if all Asean members

#### By John Ridding in Hong Kong

Hong Kong customs agents yesterday claimed a victory in their war on copyright piracy by smasbing a cross-border syndicate and seizing a record haul of counterfeit compact discs. The move comes amid an escalating row between the US and China over

the protection of intellectual property rights. The US has given China until Wednesday to demonstrate enforcefeit products. ment of a 1995 agreement aimed at stamping out piracy of US products

and has threatened sanctions on \$3bn-worth of Chinese imports. Washington is also concerned

about Hong Kong's role as a distribution centre for counterfeit goods from China. Its annual Special 301 report on US trade action, published earlier this month, nuted the problem was growing and urged Hong Kong to act decisively against retailers, wholesalers and investors involved in counter-

However, the report did not include the territory in the most serious 301

categories. The US said it would review Hong Kong's position on copyright protection in six months.

Customs officials claimed yesterday's actions demonstrated Hong Kong's commitment to tackling the problem of cross-border counterfeit trade. They said they bad seized 60.000 pirated copies of video and computer compact discs worth about HK\$3m (US\$396.000).

According to Mr Calvin Leung, act-ing head of Hong Kong's intellectual

counterfeit compact discs - declared as textiles - were seized as they were being smuggled into Hong Kong hy truck from China. A further 40,000 pirated CDs were seized at a warehouse in the territory. Three arrests were made, and the customs office said it had sufficient information to locate the syndicate's mastermind. Excluding yesterday's seizures, the

Hong Kong customs department said it had "neutralised" 16 pirate disc outlets so far this year and had made property investigation bureau, 20,000 33 arrests. The value of the 84,000

counterfeit products seized since the beginning of January is estimated at HK\$4.8m.

Referring to US concerns on the colony's role as a distribution centre for pirated goods, Hong Kong offi-clals cited several steps that are being implemented. Maximum penalties for copyright pirates were increased last year, while the territory's legislature last month passed provisions which broadened the definition of intellectnal property rights offences.

# **Airlines win US** immunity

United Airlines of the US and Lufthansa of Germany yesterday said they had received preliminary anti-trust immunity from the US department of transportation, which would allow them to co-ordinate their operations more closely. The two airlines said they expected to receive final approval from the department later this month.

The announcement follows the conclusion of an "open skies" agreement between Germany and the US earlier this year, lifting restrictions on flights between the two countries. Lufthansa and United said they would co-ordinate their routes, schedules, advertising and marketing more closely.

Washington has been pressing for open skies accords with EU members, holding out the promise of anti-trust immunity to airlines from countries with which it reaches agreement. to atrines from countries with which it reaches agreement. Germany was the first large EU country to conclude an open skies deal. The United and Lufthansa application for anti-trust immunity was attacked earlier this year by British Airways; BA and USAir, its US partner, do not have such immunity. The British carrier has opposed a US-UK open skies agreement. Michael Skapinker, Aerospace Correspondent

## Fresh mission for Unctad

The ninth United Nations Conference on Trade and Development has declared a new mission to champion the interests of developing countries on the world trade agenda.

The conference, which ended at the weekend, was held amid widespread criticism of Unctad's role in the development of world trade policy. Its future mission would be to promote economic policies, "complementing the logic of competition with the logic of solidarity," said Mr Rubens Ricupero. the organisation's secretary-general.

But little progress was made over the issue of African debt or US concern over compensation for the poorest comtries, which had been agreed at the Uruguay Round of trade talks. Unctad also recognised the link between trade policies and Unctad also recognised the link between trade pointes and foreign investment for the first time, and resolved to examine options for a multilateral framework on foreign direct investment in countries marginalised hy the liberalisation of world trade. Mark Ashurst, Johannesburg world trade.

## Polish telecoms tender awarded

Ericsson and Siemens have won a tender to supply equipment to a consortium developing a cellular telephone network in Poland. PAP news agency said the two companies would supply base stations, base controllers and other equipment to Polska Telefonia Cyfrowa (PTC), which earlier this year was awarded one of two licences to build a cellular network using the digital GSM system.

the digital GSM system. PTC earlier said it would invest about \$1bn by the year 2000 to build the network and that it would launch operations in several big cities this year.

PTC's foreign partners are US West and DeTeMobil, part of Deutsche Telekom, which each hold 32.5 per cent stakes. The consortium developing the second GSM network, Polkomtel, picked Nokia last month as its equipment supplier. Poland at present has one cellular telephone operator, Centertel, which jses an older analogue system. Reuter, Worson

## Mideast peace still strategic objective, say leaders

#### By James Whittington In Cairo

The leaders of Egypt, Jordan and the Palestinians agreed in Cairo yesterday to co-ordinate their efforts in support of a regional peace settlement. to a joint statement they said that despite the recent escalation of violence in Lehanon and Israel, peace remained a "strategic objective"

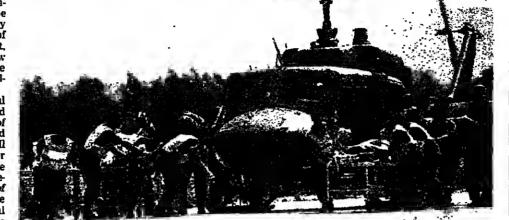

Egyptian President Hosni Muharak and Jordan's King Hussein underlined their support for Mr Yassir Arafat and the Palestinians, who began the long and sensitive negotiations with Israel on the "final status" of their territories this month in the Egyptian resort of Taba. They also agreed to meet again in the first week of June to assess the result of Israeli elections on May 29. The three-way summit.

which has been due to take the holy city should be outside place since February, comes any sovereignty. Pressed by three days after separate talks between Mr Muharak and King Hussein in Cairo which are believed to have belped calm some of the tension between Jordan and Mr Arafat.

Under intense pressure to stop attacks on Israelis hy Islamic militant supporters of Hamas, Mr Arafat had comestinian state. plained recently that members of Hamas were still active in Jordan. Yesterday, King Hus-sein re-affirmed an earlier commitment that Hamas would not be allowed to use his kingdom as a base for hostile actions. "We do not have any other motives but to work for peace for the Palestinians," he said. King Hussein has also long been at loggerheads with Mr

Arafat over the future status of Jerusalem. Last week, he said any sovereignty. Pressed hy reporters on the issue yester-day, be said Arab East Jerusalem rightfully belonged to the Palestinlans but the city should also he a symbol of Arab-Israeli peace. in contrast, Mr Arafat repeated his view that Jerusalem should be the capital of an independent Pal-

On hopes of a wider regional settlement, Mr Muharak said that whatever the outcome of the Israeli elections, he would be pushing for progress on all sides. He doubted whether Syria and Lebanon would be able to reach a peace agree-ment with Israel by the end of this year, partly because November's US presidential elections would leave little time for Washington to focus on Syrian-Israeli relations

Israeli soldiers wounded in Lebanon, the first since the April 27 ceasefire, are landed back in Israel after two Hizbollab attacks at the weekend

## Internet users 'likely to A two-tier infobahn reach 500m by 2000'

Uneven technological growth may split the world into haves and have-nots, reports Paul Taylor

inisters from 42 countries, including , the Group of Seven leading industrial nations and 32 developing countries, meet in South Africa today to try to resolve concerns that uneven technological growth could lead to a two-tler world of information "baves" and 'have-nots".

The Information Society and Development Conference promlses a lively dialogue. The developing nations are anxious not to be bypassed by the rapid growth of the Internet and the "information superhighway". The developed nations are keen to win infrastructure and other contracts in the developing world, but are disinclined to help foot the bill.

The conference has been organised in the wake of the G7 meeting in Brussels 15 months ago which emphasised the need for all countries to be

telecommunications networks, established computer infrastructures and well educated nonulations. For example, while the vast

majority of the over 40m Internet users are in North America. and western Europe, most people in developing countries still do not have access to an ordinary telephone line,

Nevertheless, western politicians such as Mr Ian Taylor, Britain's minister of science and technology, argue that new and relatively low-cost technologies such as satellite and mobile telephony, which do not require expensive fixed links, can help fill the infrastructure void.

explain that, while technology can reach all countries, "it will reach first those countries that provide a healthy investment climate, a stable regulatory approach encouraging new

It allows parents to set what they believe is an acceptable

INTERNATIONAL NEWS DIGEST Crash raises air safety fears

The crash of a Valujet Airlines DC-9 aircraft in the Florida Everglades on Saturday has raised questions over safety at the discount airline, which is already being investigated by the Federal Aviation Administration. There were also concerns over the aircraft's Pratt & Whitney JTSD engines. which are widely used in civil aviation. All 109 people on board the flight died when it turned back

after take-off from Miami International Airport after the pilot. reported smoke in the cockpit.

Valuet said it was premature to suspect anything wrong with the engines. An investigation into the crash is expected to take months to complete.

Valujet, based in Atlanta, Georgia, was set up in 1993 and expanded rapidly by offering cheap flights. Its fleet mainly comprises DC-9s more than 20 years old - the one that crashe was huilt to 1969. Mr Lewis Jordan, Valujet president, said at a press conference that the aircraft had been inspected regularly Maggie Urry, New York and was in good condition.

#### Private-sector Uganda foreseen

President Yoweri Museveni hopes that in his new five-year term the private sector will dominate Uganda and a large number of Ugandans will own stocks. Addressing the nation vesterday after being sworn in as president, the former Marxist guerrilla leader who seized power in 1986 hailed his country's economic recovery from chaos in the 1970s and 1980s.

"The next five years will be years of consolidation and movement. We cannot rest on the laurels of success," he said. "Our course of economic liberalisation has delivered and we shall maintain it. Government will continue with the growth of business – ie privatisation – and I hope that by the end of my term the private sector will be the dominant sector in the economy of our country." Reuter, Kampala

## Accounting standards backed

Nearly 100 multinational companies and other organisations have made financial contributions in 1995 to help forge a set of accounting standards for use on the world's leading stock exchanges. The International Accounting Standards Committee, which is producing the code with the co-operation of IOSCO, the representative body for securities regulators, said in its annual report that it hoped to expand the assistance programme to cover more countries. Nearly 50 of the backers in 1995 were from the UK. 13 from the US, eight from France, and six from the Netherlands, plus the so-called Big Six global accountancy firms, Companies contributing include Marks & Spencer, Unilever, ICI, Renault, Shell, General Electric, Texaco, AT&T, and BellSouth. Jim Kelly, London

## INTERNATIONAL PRESS REVIEW Euphoria less than universal

#### SOUTH AFRICA By Roger Matthews

Business Day was certainly South Africa grew up quickly not panicking. But it was getlast weck. On Wednesday, Live worried about the fall in President Nelson Mandela the value of the rand. "The presented the nation with its executive has a crisis of ecobirth certificate, in the form of nomic confidence to resolve. a a new coostitution. A day later, following the announcement by the National party that it was withdrawing from the government of national unity, Mr Mandela declared the Nation" and a "Passageway to are trying to do right. That our glory.'

when all is said and done is nance, particularly in the cco-nomic sphere."

crisis both materially and psychologically based," it said. Mr Pcter Bruce, editor of Business Report. writing under the headline "Now rule", was rather more prescriptive. He welcomed the departure of the Nationalists. But he told the African National Congress that it must sort out its economic priorities. The first steps had to be a "dramatic easing" of exchange controls, and the simultaneous relaxation of punitive import harriers. "Are sensible policies to be monotonously derailed by the ANC's fear of irritating the trade unions. or are we going to create a country where our children can thrive?" he asked. The Mnil ond Gunrdion developments were steps forfound solace io the Bible. "South Africa has justifiably heen compared to the Old Testament: a story of people trying to do the right thing hy their God, and, being people, messing it up." It said. "But dwelt on defective detail and did not, at least for the the important thing is that we

Germany alone. It's the most closely-knit fibre optics network in the world - and all Germany's major economic centres have been linked to it since 1993. We're aiming to be the first company to bring this highly advanced technology down to street level, too. Our initial target is 1.5 million Geman home connections, many of which are already up and running.

#### Laying the foundations for the information society.

Deutsche Telekom also leads the way in ISDN. Thanks to us, the system is better developed in Germany than anywhere else. Virtually every business customer can now be connected to the network and tap in to the new information society via a multimedia PC. We're pushing ahead with cable television technology, too. 24 million German households - a full 65 % of the market - are wired up and waiting to access multimedia via their TV screens. Making Germany the world's biggest domestic target market for multimedia services.

#### The world is talking our language.

GSM is the new standard for digital mobile communications all round the world. It was developed in Europe by Deutsche Telekom and our partner, France Telecom. GSM mobile communications networks have got people talking in more than 80 countries across four continents - and the number is growing all the time. On top of that, we have now opened the way for unlimited mobile communications between Europe and North America for the very first time.

#### No barriers. No borders.

It won't surprise you to learn that Deutsche Telekom is active in all the world's major economic centres. But we've also placed special emphasis on developing our business closer to home: in Eastern Europe and the CIS states. From Hungary all the way to Kazakstan, we're either building our own networks or we have already joined forces with the local network operators. You could say it has put us on the map in that part of the world. It has certainly made us the market leader.

#### You couldn't be in better company for the future.

Deutsche Telekom is the No. 1 telecommunications company in Europe - and the second largest network operator worldwide. We continue to pioneer new technologies. In fact, since 1990 we have invested DM 135 billion in new telecommunications infrastructures, which makes us the world's single largest investor in this area. We offer multimedia and online services, "smart" networks and a wealth of experience and know-how - all backed by strong business partnerships which span the globe. Many companies now have sophisticated international communications needs. Few companies are as well qualified to satisfy them as Deutsche Telekom.

Our connections move the world.

-----

and and the second second

T

3.5

Thanks to Deutsche Telekom's skills with fibre optics technology, Germany now has one of the most extensive and sophisticated telecommunications infrastructures in the world. It's called T-Net. And it's just one reason why the world is turning to us as the ideal place to join what is fast becoming the global "information society".

## SingTel will be 'leaner and meaner' company

# Japan slow to tackle sex harassment

Singapore to speed phones competition

#### By Our Foreign Staff

Singapore is to open its telephone market to competition in 2000, seven years ahead of schedule and two years after Europe and North America lib-

eralise their own markets. The move brings Singapore more in line with the telecoms markets of Hong Kong, Japan, Australia and New Zealand, which are either fully liberalised or well on their way. Singapore has been one of the world's most protected telecommunications markets, with the government owning 39 per cent of Singapore Telecom (SingTel), which has a monop-oly of local, international and wireless services.

The liberalisation move was announced at the weekend hv Mr Mah Bow Tan, minister of communications, who said SingTel would "become a leaner and meaner" company. "Perhaps more than any

country, we depend on the efficiency of our infrastructure, especially telecommunications. to attract high-quality investments. As a business hub we

must keep pace with technology, and offer telecommunications services which are as comprehensive, as efficient and competitive as possible," Mr

Mah said. Singaporeans spend more on telecommunications services than many other nationalities. adding to SingTel's considerable profits.

SingTel, which is the largest listed company on the Singa-pore Stock Exchange, produced pre-tax profits of US\$1.26hn last year. International calls accounted for just under half of the total but the company has seen its operating margins squeezed following a series of international direct-dial rate cuts over the past two years. SingTel has made considerable investments in a series of ventures worldwide. These span interests as diverse as cable TV in Stockholm and cellular services in Suzhon. China. In Asia its strategy has heen to snap up service licences as they surface, operating as a partner in joint ventures with local companies. In

Europe it has taken direct

equity stakes. The company bas 28 investments in nine countries It will face its first test of domestic competition next May when a new cellular operator, MobileOne, launches the first alternative to SingTel services in cellular phones and paging. MobileOne is a joint venture between the local Keppel

Group, Singapore Press Hold-ings, Cable and Wireless and Hongkong Telecom. It plans a two-pronged assault on the husiness and residential markets hy launching two simultaneous cellular networks. Cellular phones and pagers have been highly popular in Singapore, and even with one

of the highest penetration rates in the region SingTel'a mobile unit, MohileLink, was still attracting subscribers at a rate of 6,000 a month last year. SingTel has also been involved with government plans to huild an information technology network to link homes, offices, schools and factories across Singapore and to provide access to sites else where in the world,

S ilence among Japanese businessmen over the Mitsuhishi Motors sexual barassment case in the US was hroken last week by Mr Jiro Nemoto, chalrman of the Japan Federation of Employers Associations. a leading business lobby. "It is a shame for Japan,"

said Mr Nemoto, who is chair-man of Nippon Yusen, a shipping company which also belongs to the powerful Mitsuhishi corporate grouping. Unlike the western media, Japanese newspapers and television networks have offered virtually no analysis of the Mitsuhishi case. Much of the

news coverage was sympa-thetic, as if the carmaker was unfairly caught up in US hyste-Even Mr Nemoto's words seemed more critical of Mitsuhishi's tactical error in bandling the problem than the

alleged harassment. "In the US, sexual harassment is in some ways more serious than lavoffs," be said. Indeed, the Mitsubishi case seems to have hardly caused salarymen, as male office workers are called, to rethink their attitudes towards sexual

harassment - seku horo in borrowed Japanese. "Japanese companies do oot treat women as proper workers and they do not care about sexual harassment," said Ms Mavumi Makita, an editor of

## Investment in **Europe begins** to rise again favoured destination for Japa-

## By Stefan Wagstyl, Industrial Editor

Japanese companies' appetite for investment in Europe is ris-ing for the first time in six years, according to figures pub-lished by the Japan External Trade Organisation.

The number of Japanese companies setting up new operations in western Europe rose last year for the first time since 1989; 36 manufacturers set up operations, taking the total to 727

This is a sharp increase from 19 new companies in 1994 and 26 in 1993. While the total is well short of the peak of 88 new companies rerorded in 1989, when the Japanese economy was booming, the increase suggests Japanese companies' investment plans are recovering from the impact of the recession of the early 1990s.

Europe would increase. The survey finds Japanese

companies are committed to local purchasing, with more than half buying at least 70 per cent of parts and raw materials locally. The strength of the yen

Michael Wong had the urge to be compacted.

Michael Wong of Creative Pacific had a vision. A computer work station that squeezed component space down to nothing while, at the same time, increasing productivity.

So he went to Taiwan where an interesting company. Plustek, showed him its newest idea: a color fax machine. color photo copier. scanner and OCR, all designed in a one-button unit no larger than a shoe box.

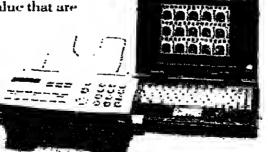

Creative Pacific decided to sell it in Australia, but in 30 other countries it is marketed as the Scanfx, the world's most complete multi-function scanner.

Scanfx is a perfect example why companies today like IBM, Hewlett Packard. Apple Computer and AT&T are heading for Taiwan. The attraction for them is INNOVALUE: innovation in design and manufacturing techniques which gives added-value to leading edge products.

Innovalue produced the first low-cost carbon fiber bicycle. And a new sophisticated PC video and audio editor for less than four hundred dollars.

In Taiwan, you'll find Innovalue in so many product areas. Perhaps yours.

If you're interested, reach us on the Internet. It is not just products, hut ideas and especially value that are VERY WELL MADE IN TAIWAN.

Selected Talwan products carry this Symbol of Excellence It is awarded annually by an expert panel of judgas only to products which excel in quality and innovativa design.

## ASIA-PACIFIC NEWS DIGEST Thai cabinet change imminent

Changes in Thailand's cabinet are imminent after the country's seven-party coalition government survived a difficult no-confidence motion at the weekend, political part, leaders say. Despite a two-day barrage of opposition allogations of corruption. All 10 ministers targeted in the motion won overwhelmingly in the 391-sent parliament, where forces ied by Prime Munister Banham Silpa-archa bold a 5-seal majority

But some ministers, particularly Mr Suchart Tancharoen, deputy interior minister, and Mr Surakiart Sathirathai, finance minister, defended themselves poorly, coalition party leaders claim. One important coalition partner, the Palang Dharma party, failed to vote for Mr Suchart, although the party is likely to remain in the coalition as long as he is removed from the cabinet. Ted Bardocke, Bangkok

## Taipei eyes offshore zones

Taiwan has a long-term plan to establish 100 industrial zones overseas, mostly in developing Asian and central American countries, according to the economics ministry. In the pext year the government will focus on 10 zones, to be located in Guatemala, Nicaragua, Costa Rica, El Salvador, Honduras, India. Indonesia, the Philippines and two in Vietnam.

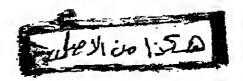

Mr Chou Yen, director general of the ministry's industrial development and investment centre, did not specify the size of the zones or the amount of investment involved.

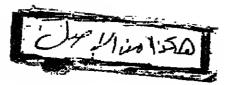

The plan is intended to belp Taiwanese companies move manufacturing operations offshore and to diversify their investments. Rising production and wage costs at home have encouraged Taiwanese companies to transfer factories overseas, particularly to China. The plan is also in part a diplomatic initiative to boost Taipet's foreign links, especially with countries "friendly" towards it. Laura Tyson, Taipe

## Imran Khan renews attack

Mr Imran Khan, Pakistan's former cricketer turned politician. today begins a visit to Karachi - his first since form announcing he would enter politics. Mr Khan plans to meet lawyers, businessmen, journalists and local community leaders in an effort to gather support for his new "movement for justice", which he plans to convert to a political party.

Mr Khan launched a fresh attack on Pakistani politicians at the weekend, calling them corrupt and ineffective. He also warned that social injustice could promote Islamic fundamentalism in Pakistan. Forhan Bokhori, Islambaa

for action over beef ban grows Financial Times Reporters

Pressure

The cabinet of the governing Conservative party is con-cerned that it will be anable to resist pressure from its backhenchers for wide-ranging retaliatory action against the European Union in the absence of progress this week towards a limited lifting of the EU ban

on British beef exports. The EU's standing veterinary committee is due on Wednesday to consider a plan, mapped out last week hy Mr Franz Fischler, the EU commissioner for agricnlture, under which Britain would impose tougher controls on the manufacture of gelatin and fallow as a precondition to the EU lifting the embargo on these products.

including worker records and the use of sub-contractors, and A senior British minister involved in the negotiations for the right to make unannounced inspections. "We said that the decision could go know a small percentage are going to refuse," said Mr John Green. C&A's head of corpo-rate affairs, "in which case we elther way. He was confident that the French government would back a lifting of the ban on these products, hut conceded that the Germans would not be won around to the Brit-

The outcome would therefore almost certainly depend on the positions adopted by the Dutch and Belgians, the minister added

Mr Malcohn Rifkind, the UK foreign secretary, yesterday said it would he "very perverse" for any government to obstruct the lifting of the ban, which was wholly "unjustif-ied". The minister said the government would do whatever was within its power to resolve the prohlem.

disrupting other areas of EU decision-making by way of retaliation. Gne possibility would be for the UK to boycott the current intergovernmental conference on reforming the EU's institutions.

The adoption of such an "empty chair" policy would undermine the IGC, since decisions in this area require unanimity. Another option would be to veto decisions in other areas requiring a full consensus rather than a majority vote.

**UK NEWS DIGEST** New powers for export licensing

A powerful cross-departmental committee to vet sensitive applications for export liceoces is being considered by the government as the main plank of its response to Sir Richard Scott's damning report on arms sales to Iraq. The committee would combine officials of the Department for Trade and Industry. Customs & Excise and the security services, and serve as an appeals trihunal for companies whose export papers had been rejected by the DTL Whitehall departments are conducting several reviews of

export procedures, the confidentiality of relations between ministers and civil servants, and dissemination of intelligence information. These are among the areas singled out for reform by Sir Richard's report, which was issued last February after three years' investigation following the collapse of the trial of three directors of the Matrix Churchill company charged with with breaching export regulations. The case was abandoned after it was disclosed that the company had exported sensitive defence-related equipment to Iraq with government conniv-ance. John Kampfner and Jimmy Burns, London

#### State revenue forecast 'mistaken'

Mr Kenneth Clarke, the chancellor of the exchequer, conceded yesterday that the Treasury had made a "mistake" in Its forecasts for this year's government revenues, as senior members of the governing Conservative party reacted angrily to the chancellor's warnings that he may not be able to deliver significant tax cuts to the November Budget. He also said his forecast for 3 per cent economic growth this year was "on the high side", following disappointing first-

quarter figures. However, he insisted it was premature to revise the growth forecast downward. The chancellor said that his scope for cutting taxes had been severely limited by a shortfall in revenues, which meant that borrowing was running well above the forecast of £22.5hn (\$34.2bn) for the year. Robert Peston, Political Editor

### **Record turnover for gilts market**

Turnover in UK government bonds, or gilts, has reached record levels following the introduction this year of the new open market in gilt sale and repurchase agreements, or gilt repos. The repo market, which started operation in January, is part of the wide ranging modernisation of the gilts market, instituted hy the Treasury and the Bank of England aimed at cutting the government's borrowing costs. Turnover in gilts in the first quarter of 1996 reached an average daily value of 28.1bn. (\$12.3bn) the highest ever quarterly figure, the Bank of England said. This compares with an average daily value of \$6.2hn for the whole of 1995. Graham Bowley, Economics Staff

#### Import levels soar

British manufacturers are losing market share, a husiness study says today. A report by the Chartered Inslitute for Marketing says that UK manufacturing exports last year grew about 5 per cent less than the market for UK exports.

The figures, which are derived from calculations hy the Organisation for Economic Co-operation and Development show that this gap was larger than any other major industria lised country. The group also points out that imports into the UK have recently soared.

Imports from newly industrialised economies in the Far East, such as Thailand, have risen 33 per cent in the past three months, while imports from the US have surged 23 per cent. Part of this surge may reflect the increase in factories owned hy overseas companies assembling components from the Far Gillian Tett, Economics Correspondent East.

## new share issues By Norma Cohen Leading UK shareholders are

**Investors** agree

to reform of

prepared to accept lower dividends from companies which raise capital by issuing new shares to existing investors at a discount to market prices. The move is a significant concession to the growing

group of British companies and government officials which argues that the cost of raising equity capital for UK companies is too high when compared with that of overseas competitors.

However, MAM and other shareholders say pre-emptive rights - which give existing tovestors the right of first refusal over any new offering of shares - must be allowed to remain in place. Merchant bankers which advise companies on how to raise fresh casb have argued that as a practical matter, fees and discounts cannot be negotiated on each new offering of shares which goes to market.

in a series of interviews with the Financial Times, leading shareholder organisations and fund managers have acknowledged that current practices probably mean that many companies needlessly overpay when selling new shares. Shareholders and their trade

associations also say that they are prepared to negotiate with

## THIS WEEK

Chumminess across the Channel

### DATELINE

Paris: Chirac's early state visit to London signals that Anglo-French relations are in much better shape than is popularly thought, writes David Buchan

for his nuclear tests last year, at a time when most of his European Union partners condemned them. Lonely support of difficult or unpopular causes is a strong element in Gaullist mythology, from

country.

wartime London to Bosnia. More problematic is whether Chirac will get a chance to extend his chumminess to the British people, and indulge his penchant for pressing the flesh of bystanders. Talks with the various UK party leaders, discussions with business leaders at the Bank of England, a briefing on Northern Ireland from Sir Patrick Mayhew and tea with the Queen Mother hardly provide such an Bosnia.

opportunity. Chirac will be able to use his one planned walkabout - on Thursday. in the Easterhouse area of Glasgow, a renovated slum which still has more than 20 per cent unemployment - to take a look at Britain's fracture sociale and to see what les-sons it has for that in his own

But the response of the British and French public to each other's

**BROIDER** 

leaders is hard to gauge. It is a cliche to talk of the fractious history between the two countries. The respective folk images that the Brit-ish and French have of each other are rooted in long-ago wars, and since 1815 the two countries have largely been on the same side, though not always gloriously - in the Crimea, the two world wars, during the Suez crisis and in Economics and politics have lat-terly provided more ground for ten-

sion. The fact that the French economy, which was much smaller than the UK's in 1945, is now far larger, probably grates on the subconsciousness of many Britons. Indeed, Chirac's arrival tomorrow on a Eurostar train that will bave Emu aside, the two countries' views on EU institutions are not far crawled across Kent after whizzing from Paris to Calais will symbolise apart. The French president will be

If they are looking for intellectual revenge, free-market minded Brit-ons can take satisfaction from the paradox that the Treaty of Rome. which Paris helped write, is gradu-ally obliging France to liberalise virtually every aspect of its economy except agriculture. The French-inspired project for eco-nomic and monetary union (Emu) has proved a fresh bone of contention between the two countries. But Chirac will argue at the Bank of England that France wants the UK in - not ont of - a single currency. If his listeners object to the damage this might cause UK exports, he might point out that the strong franc has not stopped France from continuing to run a large bilateral surplus with the UK.

renewing his Gaullist credentials as he lays a Cross of Lorraine wreath on the de Gaulle memorial in Lon-don tomorrow. De Gaulle always produced profound irritation as well as admiration in Britons. Churchill said of the general after the second world war that "of all the crosses I had to bear, the Cross of Lorraine was the beaviest"

But Chirac inherits from de Gaulle an approach to Europe, based on the nation-state, that hroadly suits Britain. He wants to give a central role to national parliaments rather than more power to the European parliament, and to keep most internal security and all external security issues in the hands of national governments. Any future Labour government in Britain would probably not quarrel with this approach, while Labour's commitment to signing the EU social chapter is frankly welcomed in Paris. Perhaps, therefore, the present improvemant in Anglo-French relations may last beyond tha next UK election

will have more than 200 employees from next month when it acquires a Internet brand name and developing a range of software products pilot plant in Stevenage, home of Glaxo Wellcome. "It's very difficult to get a large group of people all together to play the tune you're hearing," warns Padfield.

Wallis seeks

## Stuart Wallis knows what he likes: difficult companies. The former chief executive of Fisons, which fell victim to a £1.83bn hostile bid from Rhone-Poulenc Rorer last year, says, be has turned down a clutch of job offers because they were too dull,

The 50-year old executive says several FT-SE 100 companies have approached him in recent months. "Since Fisons, 1 have had about 50 different offers from all sorts of people. Most of them have not been vary exciting. I want something with a challenge," he explains. He has been poring over the offers at the London headquarters of Arthur which has loaned him an office

gemasters, the specialist Yorkshire manufacturer of castings and forgings. While admitting he knows lit-tle about the industry, Wallis does not see that preventing him from advising the company on marketing, overseas sales and the path to flotation. For at Fisons, he didn't know a monoclonal antibody from a tin of beans, yet be returned that business to health with heavy

restructuring and the sale of assets. Wallis says: "The bastc managerial skills can be applied to almost any company. My experience from Fisons and Bowater should be of help to Forgemasters." Nevertheless, he has vowed not to jump into the front seat. "One of the skills in

English Channel in state.

He was on a ship with his wife Eve travelling from Singapore to Bangkok. It was a beautiful morning as he surveyed the coastline in the distance. As usual, a large pile of faxes had just arrived. It was then that Williams-Jones, who is 51 and had been president of UIP since 1984, decided he was going to give up his salary of more than \$1m a year and all the benefits of playing in the Hollywood first division. However, he would also be escaping the pressures of having to travel for

up to six months each year. He says: "I told my wife that I had made a decision that I wanted to move on to other opportunities within the industry - most proba-hly production." And so it was that Williams-Jones, who has a Welsh-Jewish background, had the pleasure of inviting his three bosses from the three UIP studio basinesses - John Dolgen, chairman of Viacom Entertainment, Frank Mancuso, chairman of Metro-Goldwynand Kon Maver, bre MCA - to breakfast at the Bel Air Hotel in Los Angeles to tell them of his decision. It is usually the other way around: senior executives being taken to breakfast by studio heads to be fired. "After they got over the shock and stopped choking on their coffee, they understood," says Williams-Jones

Joseph Stalin".

Last year UIP, which has 900 employees in 40 offices around the world and is active in 150 countries, had revenues of \$1.5bn. Apart from generating rising revenues from outside North America, Williams Jones is most pleased about open-ing up countries such as South Korea for the Hollywood majors.

In 1987 South Korea was worth just \$10m a year to Hollywood in film, television and video revenues yet cinema attendances per capita were among the highest in the world. The UIP head discovered more than 90 per cent of the revenue was going to middlemen, and started introducing direct distribu-tion. There was "unbelievable opposition" to this, he says. A hollowedout book on Korea with a dead snake inside was sent as a warning; a limpet mine exploded in the front of UIP's local office; and Williams-

Jones was burned in effigy. Last month his three bosses formally thanked Williams-Jones for his contribution to the success of UIP and said he "has more than earned the right to move on". After staying until he has helped choose SOT. IUS nove is : kera ro involve looking for films of his own to produce and seeing them through from conception to release. "A lot of film-makers tend to walk away from a film the moment it is away notification and the moment is a completed, and they go on to the next project. That, for me, is when it gets interesting," he says. Running a media investment fund and film industry consultancy are also likely to form part of his life. His new company, Merlin Angle-

sey, will be a co-operative venture, with Williams-Jones combining his commercial and marketing skills with those of his literary and production-oriented wife. Eve Forman. But first they are planning to take six months off on Africa with sev-eral cases of books. Their lodge has no electricity or telephone.

Williams-Jones: has a 'tough mountain to climb' despite his contacts

The reading will be partly for pleasure but they will also be looking for movie ideas. After years of promoting films all over the world, Will Deneves De

already grossed \$178m outside North America. "Sometimes too much is spelled out today," he says. "I think we have lost some of the art of story-telling." Despite short-comings in movie story-telling, he sees a boom coming both in cinema exhibition and for film production.

In Britain, for example, with the belp of multiplex cinemas, attendances of 130m are projected for this year compared to 55m in 1987. Everywhere, from Bangkok to centres are being built and a multi-screen cinema is always included. And film production is at the core of the satellite and pay-TV revolution. But turning Merlin Anglesey into a success will be a formidable challenge for Williams-Jones, despite his extensive Hollywood contacts. He says: "It will be marvellous. but I am as aware as anyone that the failure rate is spectacular. It's a

## Palmer highlights Digital's historic Net contribution

Dutting his mouth behind his company's money, Bob Palmer, chief executive of Digital Equipment, last week con-ducted a "cybercast" on the internet to announce the company's strategy for playing a bigger role in the development of the global computer network, reports Louise Kehoe in San Francisco.

Digital was among the pioneers of the Internet, Palmer recalled. It was the first computer company with a site on the ARPAnet, the Internet's predecessor. Digital was also the leading supplier of computers for the ARPAnet, the first computer company with an Internet site and the first to take orders over the internet.

However, Digital's role in networking history is unknown to many of the millions of new Internet users who are more likely to think of Netscape or Yahoo as the true innovators.

Then came AltaVista. A "search engine" designed to plough through hundreds of thousands of World Wide Web pages to seek information that matches users' requests, Digital's AltaVista was launched

that will piggyback on the success of the search engine. Perhaps some of those products will make it easier to listen to Palmer's next cybercast. His first one was a technical challenge that defeated at least one long-time Internet user. Chiroscience cheer for chief John Padfield, chief executive of

company rise smartly in the last three weeks, writes Simon Knper In London. Chiroscience was worth £350m at Friday's close, with its shares up 202p to 485p since April when it published a research

and development update. The City of London – and Pad-field – are most excited about an enzyme-blocking MMP inhibitor for arthritis. This could diminish arthritic disorders, not just minim-ise pain as existing drugs do. The inhibitor has entered Phase I clinical trials, though it is still years from reaching the market. When it does, says Padfield, sales could be

worth \$1bn a year. Padfield knows all abont big drugs. At Glaxo he helped create Zantac, the anti-ulcer drug that became the world'a best selling prescription medicine and gained a place in the Guinness Book of Records.

After taking a PhD in pharmacy at Nottingham university and teaching pharmacy at Bath univer-sity, Padfield joined Mann Baker, part of Rhône-Poulenc Rorer, in 1977, moving to Glaxo two years later. He moved to the board of Glazo Research in 1986, and in 1990 became managing director of Glaxo Manufacturing Services. Later a headhunter rang, asking if Padfield fancied leading Chiroscience, "I'm

knowing when not to get too involved," he says. By maintaining a distance from

the operating management, he hopes to divide his time between a number of companies. As well as Forgemasters, Wallis is also chairman of LLP, the former Lloyd's of London publishing house, and expects to announce a senior executive role at another company sbortly, which will be his main job.

Britain's industrial policy has undergone a subtle shift of late. lan Lang, the trade and industry secretary, has quietly jettisoned the strategic interventionism favoured by his predecessor and said that he seeks above all else to promote domestic competition.

We have beard this all before. Whether the government should tenderly nurture national champions or let rival producers slug it out in home markets is a long-running debate. Indeed, the two alternatives seem periodically to swing in and out of fashion. The first question to ask is which

alternative is more likely to breed companies that are best placed to compete in an unforgiving global marketplace? On this. Lang's instincts are well placed. As management guru Michael Porter argued in The Competitive Advantoge of Notions, world-beating companies often get up to scratch only by operating in an atmosphere of fierce domestic rivalry. But this is much easier to achieve in indus-tries where economies of scale are relatively unimportant than, say. the supply of gas to residential customers or the production of jumbo

A decision to promote domestic competition may also have macroeconomic consequences, perhaps affecting inflation by altering the way in which firms set prices. An article in tomorrow's Bonk of England Quorterly Bulletin sheds light on the way companies set prices in Britain. The article describes the results

of a survey of more than 700 com-panies carried out by the bank last autumn. Almost 40 per cent of the companies questioned said they set prices at the highest level they

further 25 per cent said prices were set in relation to their competitors" In contrast, some 37 per cent said they set prices by adding a fixed or variable mark-up to their costs of prodoction. The survey asked the same question in a different way hy asking firms to rank in order of importance a series of theories which sets out to explain why prices in the real world appear to be sticky.

thought the market would bear. A

This suggested a greater role for cost-based pricing than the other question had, especially among small firms for which the expense of monitoring market conditions is relatively burdensome. The most popular theory was one suggesting that firms do change prices in response to fluctuations in market conditions. but only to a limited degree because their costs do not rise much as they increase output. Next most popular after the costbased theories was one based on companies' desire to avoid price wars. Under this hypothesis, businesses are reloctant to change their prices even in response to changing costs, fearing their competitors will follow suit and - in the case of a price cut - trigger a

downward spiral. One would expect policies that promoted competition to encourage market-based pricing at the expense of cost-based pricing. Com-petition should also reduce the size of the mark-up that companies can sustain. This is difficult to assess, bot some clues emerge from a recent study of mark-ups in the

manufacturing sectors of industrial countries carried out by the Organisation for Economic Co-operation and Development. This suggests that the highest mark-ups have

"s of firms citing given lactor as most important reason to change price --- ---- 40 Factor Rise :64 Material costs 28 **Filval** price 16 36 Change in demand 15 22 Prices never change Change in market share 2 Change in productivity · 1 5 to 3 or 2 1 Source: Bank of England

**Reflections on price stickiness** 

A more competitive environment could alter the way companies set prices

The ups and downs of companies' prices

been whittled away in most counincreased competition would have tries in recent years, perhaps a direct, albeit temporary, effect on inflation. Greater competition might also reduce the danger that because greater openness to trade has made competition tougher.

Interestingly, the pattern of mark-ups from industry to industry has changed little since the 1970s. High mark-ups remain most prevalent in industries such as tobacco products, industrial chemicals, drugs. medicines and computers, and radio, television and communications equipment. Mark-ups are relatively low for textiles, food, printing, electric machinery and motor vehicles.

Conventional wisdom has it that companies are much less willing to Mark-ups are bigher in thosa cut prices than to increase them. industries comprising relatively few competitors than in those with The Bank of England did not test this explicitly in its survey, but it many. They are also bigber in industries in which companies prodid confirm that such decisions would be taken according to different criteria. Almost 65 per cent of duce differentiated products rather companies said that rising raw material prices were the factor most likely to prompt a price increase, but only 28 per cent said than homogeneous ones. But this does not mean that high mark-ups are necessarily a bad thing. They may provide a reward for expensive innovation.

A fail in mark-ups as a result of would lead to cuts. Changes in rivals' prices or the state of demand were more likely to trigger 4 cuts than rises

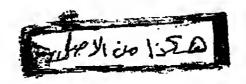

Downward price stickiness becomes more of a problem when inflation is low, because the relative price changes needed to signal scarcity or oversupply are more likely to demand that the prices of out-of-favour goods fall in cash terms. When inflation is higher, the price of out of favour goods can continue rising, only less quickly. The psychological barrier against

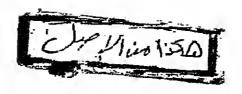

price cutting has clearly been weakened by the recession and by the continued mood of bargain consciousness among consumers during the recovery. But the fact that three times as many companies told the bank they never cut prices

as said thay never raise them, suggests it has by no means been eliminated entirely. This remains an obstacle to moving from what has been an era of historically low inflation to one of effective price stability.

A concerted effort to intensify product market competition would presumably help to weaken resistance to price cuts, and thereby help that transition. But the bank's survey suggests it would also encourage companies to review their prices more frequently and to change them more frequently, too. A more competitive market might therefore be one to which compa-nies are quick to raise prices at any How do UK companies set

prices?, by Simon Hall, Mark Walsh and Tony Yates: Bank of England Quarterly Bulletin, May 1998. Mark-up ratios in manufacturing industries, by Joaqnim Martins. Stefano Scarpetta and Dirk Pilat Working paper 162, OECD, 1996.

## Whitbread US drilling rivals court Transocean licensing deal with Labatt's

#### By Roderick Oram, Consumer Industries Editor

Whitbread is close to plugging several gaps in its beer portfo-lio by securing a long-term UK license for Labatt's, the Canadian lager.

The deal would add an unwelcome complexity to the delicate negotiations by Bass to hny Carlsberg-Tetley, the joint venture between the Danish hrewer and Allied Domecq. to make it the largest UK hrewer.

Labatt has a sales and marketing company in the UK which contracts most of the hrewing of some 500,000 hecto-litres of beer a year to Carlsberg-Tetley.

If Whitbread gets the license it will want to brew the beer. Thus, it will either hny out the contract or let it run its course, Either way, the eventual loss of volume would likely lead Bass to reduce its offer for Carlsberg-Tetley.

Bass faces an uphill struggle to win regulatory approval for the acquisition because the merged gronp would have more than 35 per cent of the market. Losing Labatt's would not ease the way because competition regulators appear not to count contract volume towards market share.

With the liceuse, Whitbread will gain its first "ice" beer and its first bottled US beer, Rolling Rock. Its market share will rise by about one percentage point to about 15.5 per

cent, industry executives said. "This will give Whithread additional volume but with a North American slant which doesn't affect its large sales of Heineken and Stella Artois," an analyst said. Valuing the deal was difficult, a competitor said, without knowing the

the Labatt's license arose, competitors said, when Interhrew, the Belgian owner of Stella Artois, acquired the Toronto brewer last summer. Since then, Interbrew has been seeking a new UK licensee to give Labatt's a firmer footing in the competitive UK market. Labatt contracted nut UK hrewing first in Greenalls Gronp, then Allied Domecq and now Carlsberg-Tetley. Vaux, the northern brewer, also produces and packages for it.

Whitbread was the likely choice for the Labatt'a license hecanse it handles Stella Artois for Interbrew. But a deal would present Whitbread with some portfolin issues to resolve, a competitor said.

Nntahly, most of Labatt's sales of are nf Labatt's Canadian, a standard lager of 4 per cent alcohol by volume. This will compete against standard Whitbread's Heineken. Simifarly, Labatt's Blne is at the bottnm end of the premium sector competing against Hem-eken Export and Stella Artois.

In a further twist to its strategy, Labatt had also plunged into UK pub owner-ship, building up a chain nf some 500 pubs, most of which were acquired from hig brewers when the government fnrced them to reduce their estates.

It is highly unlikely Whitbread will take on the pubs as

well, an analyst said. Labatt's chain will be added to the large pool of pubs up for sale. Last week, Inntreprennenr, the jnint venture between Grand Metropolitan of the UK and Foster's Brewing Group of Australia, sold 1.400 pnbs to a bank syndicate, which in turn is seeking long-term bnyers.

Consolidation at Lloyd's of London is being accelerated by a merger deal which will create the insurance mar-ket's largest underwriting syndicate. limited liability investors. Murray Lawrence, one of the largest

managing agencies running syndicates at Lloyd's, plans to merge seven syndi-cates under a giant "umbrella" syndicate that will have the capacity to underwrite business generating more than £500m in premium income. That

would put it on a par with a middle ranking UK insurance company. The group also plans to create an insurance company to supply permanent capital to the umbrella syndicate

and own the managing agency. Existing, traditional Names on Murray Lawrence syndicates will be offered the chance to buy shares in the new insurance company but could carry on underwriting on the umbrella syndicate with unlimited liability. Names are individuals whose assets have tradition-

ally supported Lloyd's. Mr Paul Archard, Murray Lawrence managing director, said the merger

Charterhouse

reflected a worldwide trend towards larger insurance companies offering greater financial security and more efficient use of capital. Some Names are worried that consolidation at Lloyd's will reduce the choica of syndicates. But Mr Archard said: "It is no good them having all the choice in the world, if they are in a dwindling business Similar deals are likely at Lloyd's as

the market moves closer to implementing its recovery plan this summer. Many traditional Names are expected to leave Lloyd's, paving the way for addi-tional corporate investors. Downward pressure on premium rates is also

threatening profitability, increasing the incentive for consolidation.

Under the Murray Lawrence deal, expected to he in place by next year, the company will reduce its underwriting capacity from £632m this year. But it expects the more efficient use of capi-tal and other economies will increase

returns by at least 14 per cent. Murray Lawrence has not ruled out floating the proposed new insurance vehicie. Although it is merging its syndicates, it plans to continue operating seven underwriting units covering different product areas to preserve underwriters' freedom

**Lucas Pension** Vodafone advertising restructures budget to rise to £20m £3bn portfolio By Christopher Price

By Norma Cohen Vodafone, the UK's biggest mohile telephone gronp, is to more than treble its advertising hudget over the next year to £20m in response to the growing threat of competition, particularly from Orange, the newest cotrant to the £4.5hn UK cellular telecoms market.

Vodafone considers the competitive 'war' has now moved away from issoes of price and coverage to marketing.

Orange spends around £30m year on advertising, and the the uext 10 years. size of its expenditure has helped the group, which significant investment for the floated earlier this year, to a 7 first time in emerging markets per cent market share in its securities. It also involves a sharp reduction in its holdings

## **Bates Worldwide paid** Bungey £728,251

#### By Jane Martinson

Mr Michael Bungey, head of advertising agency Bates Worldwide, received a total pay package of £728,251 in his first year as a board member of Cordiant. Mr Bungey's salary rose 7 per cent to £433,327 after a pay review, while other benefits reflected his move to the US. His bonus was £119.165.

The year, in which Cordiant was formed after its acrimonious split from the Saatchi brothers, was described by Mr Bungey as a "roller coaster". Bates was hit by the with-

1

t

drawal of the \$400m (£263m) a year Mars account. Cordiant said the package reflected the market price and the role Mr

Bungey played. Mr Edward Wax, who was also appointed to the Cordiant board in January 1995, received

a total of £685,657 for his role as head of Saatchi & Saatchi Advertising Worldwide. Mr Bungey will receive a per-formance-related bonus of 40 per cent of his annual salary in

1996, as will Mr Wax, Mr Charles Scott, the chairman, and Mr Robert Seelert, the 4.

 $\Omega$ 

Mr Carlo De Beoedetti, Olivetti chairman, said the Italian com-puter group would float Lexi-kon, its office equipment subsidiary, on New York's Nasdaq stock exchange at the end of this year or the beginning of next year.

Speaking at Friday's annual meeting of sbarebolders, Mr De Benedetti said Olivetti was considering the sale of some 40 per cent of Lexikon, but be did not put a value on the company. In the past Lexikon has been valued at as much as L800bn (\$513m).

Olivetti had already announced its intention to seek a stock market listing for Lexikon as part of the group's overall restructuring plan, but until Friday no details bad been given.

Mr De Benedetti said Credit Suisse First Boston, which is advising Olivetti on the sale, was also considering whether to grant Olivetti shareholders rights to shares in Lexikon.

"It's possible . . . the flotation will take place in a form which allows Olivetti sharebolders to participate." said Mr De Benedetti, although he added there were certain legal and practical obstacles to overcome.

Olivetti is looking to make a net profit following last year's record net loss of L1,598bn, mainly blamed on restructuring charges and interest payments.

Last year's record L2.257bn

Carlo De Benedetti: considering the sale of some 40 per cent

rights issue was aimed at fundtion into a broad-based infor ing the recovery of Olivetti's mation technology and telepersonal computer division. communications company. Some 70 per cent of Olivetti's which is losing money, and the acceleration of its transformashares are now owned by non-

Italian investors, but none of them spoke at Friday's meet-ing. Two US pension funds, representing less than 1 per French workforce cent of Olivetti's capital, voted By David Owen against the resolution to appoint new board members. Olivetti said only 0.19 per cent in Paris of the overall share capital

opposed the resolution. Olivetti said first-quarter operating profits were higher than in the first quarter of 1995, and it repeated its determination to return to net profit this year. The company also published details of the firstquarter results at the PC com-pany. It lost L18.7bn in January, offset by pre-tax profits of L400m and L1.4bp in February and March respectively. Mr De Benedetti said the PC

division and Omnitel Pronto Italia, the mobile telecommunications operator in which Olivetti has a 41 per cent stake. were botb performing better than expected. Systems and services, Olivettl's biggest operation division, was returning results slightly lower than budget at the moment, be said. another three years, he said

the treasury's reconfirmation of the bank's management and most board members was a

Automobiles Peugeot, one of the carmaking subsidiaries of Peugeot Citroën, the French car group, is to reduce its French workforce by 1,262, or about 2.5 per cent, as part of its

efforts to control costs. The company said the reductions, which will cut its French workforce to less than 50,000, would be effected by June 1997. All those who leave are expected to do so voluntarily. Affected sites would be Sochaux, Mulhouse, Poissy, Sept-Fons and Valenciennes. The company, which is striv-

ing to maintain its position as one of Europe's most efficient carmakers, said it was having to operate in a difficult economic environment. European car sales had

tallen from 13.5m vehicles in 1992 to just over 12m in 1995. This decline was equivalent to "the annual sales of a large

## Komerční Banka in further GDR issue

#### By Vincent Boland in Prague

Komerčni Banka, the leading Czech commercial bank, bas completed the sale of its second tranche of global depositary receipts in less than a year with an issue of \$50m of shares to new international investors. The new tranche represents 3.2 per cent of Komerchi's out-

standing equity and brings its total GDR programme to about 8.5 per cent of its share capital following an earlier issue last

About \$140m of the bank's sbares are now held in the form of global depositary receipts by foreign investors. Each of the 1.83m GDRs in the new issue is priced at \$26.40 and represents one third of one share in Komerčni. Mr Ivo Lurvink, head of CS First Boston in Prague, which lead-managed the issne, said two-thirds of the issue had been placed with European and Aslan investors, with the rest European manufacturer". It said manufacturers based

in countries with strong currencies, including France, were operating under a handicap when compared with those based in countries with weak currencies. The disclosure followed last

week's announcement by Peugeot-Citroën of a 1.3 per cent increase in first-quarter sales from FFr42.67bn a year earlier to FFr43.24bn (\$8.37bn).

However, the number of vehicles sold worldwide by the group slipped below the 500,000 mark to 494,700. Sales of Peug-eots fell 13,500 to 290,700. whereas sales of Citroëns rose to 204,000 from 197,000.

Last month. Peugeot-Citroën reported a 45 per cent decline in 1995 net profits to FFr1.7bn and cut its dividend from FFr6 to FFr5 a share after what it termed a "disappointing" year. Mr Jacques Calvet, chairman, said at the time that prospects for 1996 were "rather sombre".

FFr43.6bn, up from FFr39.1hn, GEC Alsthom of which Alcatel Alsthom consolidates 50 per cent, contributed FFrS.48bn to group sales, up from FFr7.56bn. Telecommunications sales

FFr12.89bn in the first quarter but there was a big The bank retains the option to increase the size of the issue

by 15 per cent before the offer closes on May 15. The GDRs do not carry voting rights. Two other Czech banks are planning to launch global depositary receipts pro-

grammes this year, Ceska Sporitelna, the savings bank, begins a roadshow this week to woo foreign investors for an issue of up to 10 per cent of its share capital. IPB, the third largest bank, is also planning an issue later this year, to be lead-managed hy Nomura International.

GDRs are popular with foreign investors and with the banks because they have been approved by the Czech National Bank in advance of being issued, so investors do not have to seek specific central bank permission to huy them as they are required to do for direct purchases of shares. Bank shares prices have risen sharply in recent weeks on the strength of good results in 1995 and a better outlook for bad dehts.

## **NEWS DIGEST Petrofina forecasts** static first half

21

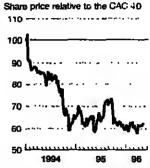

Petrofina, the Belgian integrated oil company, is forecasting net profits for the first half of 1996 similar to those in 1995. with a weak chemicals market offset by an improving US gasoline market. Mr Francois Cornelis, chief executive, said 1996 had been difficult, especially in chemicals. Petrofina was also still suffering from the dollar's weakness against the Belgian franc.

However, refining margins had improved "substantially" in April and May due to a recovering US gasoline market. Overall, Mr Cornélis said, net profit for the first half "sbould be at the same kind of level as the first half in 1995", but be believed market conditions would improve in the second ball. Neil Buckley, Brussels

## Alcatel Alsthom sales slip

Alcatel Alsthom, the French **Alcatel Alsthom** electronics group, said first-quarter sales fell 4 per cent from FFr37.25bn to FFr35.77bn (\$6.9bn). On a comparable structure basis. 100 sales slipped 1.4 per cent. First-quarter orders were 90

fell 4.7 per cent to

rise in orders. The decline in sales was chiefly because of a fall in exports by its European units to China and weaker business in fixed networks in France, while the rise in orders came from transmission, access, mobile telephone infrastructure and space communications operations, it said.

Sales in the cables division fell 11.2 per cent to FFr6.74bn, with a decline in hilling and new orders reflecting a fall in the market for underwater cables. Alcatel Alsthom said the cable business was improving noticeably in the US and in terrestrial telecommunications cabling. AFX News, Pari

## Shionogi Pharmaceutical link-up

Shionogi Pharmaceutical, Japan's fourth-largest drugmaker. announced It would team up with Bristol-Myers Squibb of the US to conduct the last leg of development of a bypertension treatment licensed by Sanofi of France. The companies will develop and market irbesartan, a new treatment for high blood pressure and beart failure, for the Japanese market. Sanofi bas already filed for approval of the drug to the European Medicines Evaluation Authority in Europe, Emiko Terazono, Tokyo

## Hindalco Industries ahead

Hindalco Industries, India's leading aluminium group, lifted gross profits 46 per cent to Rs6.76hn (\$191.5m) in the year to March 31, on sales up by 26 per cent to Rs14.22hn. Net profits increased from Rs2.92bn to Rs4.01bn after a substantially higher tax provision of Rs2.40bn against Rs1.38bn. The company raised its dividend by 50 paise a share to Rs6 a share. Kunal Bose, Calcutto

# **Guangshen Railway oversubscribed**

#### By John Ridding in Hong Kong

Guangshen Railway's public sbare offer in Hong Kong was beavily oversubscribed, with demand exceeding supply by just over seven times.

The operator of passenger and freight rail services between Guangdong and Shenzhen in southern China is the latest mainland company to list on the Hong Kong market. These issues, dubbed H-shares, have shown signs of recovery over recent weeks after a protracted period of sharp falls. in addition to the Hong Kong offering, Guangshen will he listed in the US in the form of

American Depositary Receipts.

One ADS equals 50 H-shares.

Mr Ge Wenan, Guangshen's chairman, expressed satisfaction with the response from investors. Analysts attributed the strong demand for the issue, the 20th H-share, to the

predictable earnings flow at the company and to the fact that liquidity would be supported by its large size. Signs of an easing in China's austere economic policies and a recent reduction in interest rates have also improved investor sentiment towards the mainland.

Net proceeds of the issue, Hopewell Holdings' plans to offer 30 per cent of its Thai estimated at about HK\$3.42bn (US\$442m), will be used to purunit after securing government chase new rolling stock and support for its Bangkok masslocomotives, to reduce debt. transit project will be the and for working capital. sternest test of investor confidence in the company, analysts

said. They said Hopewell (Thailand) Ltd's planned IPO, aimed at raising some Btlabnm, or HK\$1.5bp, and its listing on the Stock Exchange of Thailand in 1997 would likely prove critical in determining the fate of Hopewell's participation in the project.

Under the terms of the proposed IPO, Hopewell would retain a 70 per cent stake in HTL, which holds 70 per cent in the Bangkok Elevated Road-

## Sandvik may try for majority stake in Tampella

#### By Hugh Carnegy in Stockholm

22

A heated battle for control of Tampella, the Finnish industrial group, by two Swedish rivals has been stepped up by Sandvik, the Swedish tools and apeciality steels group, which said it was considering a move to secure a majority stake in the company.

Tampella is also the subject of a SKr1.83bn (\$270m) takeover bid by another Swedish company, Svedala Industri, a leading mining and construction equipment maker. Mr Clas Ake Hedström, Sandvik ent company.

By Michael Lindemann in Munich

Viag. the leading German

coming from abroad.

## First-quarter boost for Dresdner Bank

Dresdner Bank expects a marked rise in profits this year after a strong performance in the first quarter. Mr Jurgen Sarrazin, the chairman, told the annual meeting. But he said it would be wrong to expect the trend of the first quarter – in which operating profits more than doubled - to continue for the whole year. While Dresdner benefited from "a following wind". performance was influenced by one-off profits or fluctuating

market conditions. Mr Sarrazin said commission business in securities bad shown unusually high profits in the first two months. The result compared with a poor first quarter in 1995 and also reflected the first-time consolidation of Kleinwort Benson, the UK investment bank. Financial trading profits had also risen, already reaching nearly two-thirds of last year's total. However, traditional loan business remained flat. Group interest income was 3 per cent higher in the first quarter, but slightly down at the parent bank. Costs rose 17.5 per cent, although only 4.7 per cent with the exclusion of Kleinwort Benson, Mr Sarrazin said stagnating interest margins showed the need to cut costs. In 1995, Dresdner raised operating profits 22 per cent to DM1.99bn (\$1.31bn), with most of the growth Andrew Fisher, Frankfurt

## Zurich Insurance ahead 25.7%

Zurich Insurance, the Swiss-based insurance group, announced a 25.7 per cent increase to SFr674m (\$706.6m) in net profits for 1995, compared with SFr695.4m in the previous year. The group said non-life pre-tax profit rose 41.1 per cent. from SFr896m a year earlier to SFr1.3bn, and its non-life business rose by 16.2 per cent from SFr142.1m to SFr165.1m. Zurich said the increase in both non-life and life pre-tax

profits led to the "gratifying rise" in 1995 net profit. Analysts had expected Zurich to post a 1995 net profit of between SFr856m and SFr850m. The divideod was set at SFr6, at the higher end of expectations, compared with SFr4.80 last time. Non-life business claims in 1995 were lower than the previous year, while the overall loss ratio "nevertheless increased" as a result of a strengthening of technical reserves in 1995. Parent net profit rose 36.4 per cent. from SFr351.5m a year earlier to SFr479.4m. AFX News, Zurich

### Arjo Wiggins unit lifts sales

Ariomari-Prioux, the Ario Wiggins Appleton unit, recorded sales in the three months to March up from FFr7.1bn a year earlier, to FFr7.4bn (\$1.4bn), according to a company announcement in the official bulletin, BALO.

AFX News, Paris

NOTICE TO SONDHOLDERS Acer Incorporated

This is to inform you that the Bonds may be converted into common shares ("Shares") or Entitlement Certificates (as defined in the Indenture) of Acer Incorporated (the "Company") commencing 24 May, 1996. In addition, the Company proposes to exercise its call option to redeem the Bonds on 31 July, 1996 and will inform the Bondholders of details thereof in due course,

Citibenk Taipei also acts as the local conversion agent (the "Local Conversion Agent") under certain agreements between the Company and Citibank Taipei dated 20 September, 1991. Converting Bondhokkers may contact Citibank Taiper to handle relevant matters concerning the conversion of Bonds into Entitlement Certificates (hereinsfter "BCs") or Shares. Pursuant to the amended regulations of 3 March, 1996, the converting Bondhokker is required to appoint his own local agent (the "Local Agent"). The Local Agent must be a financial institution which is approved by the ROC Ministry of Finance to engage in agency business. The converting Bondhokker may choose Crithank Taipel or any approved Financial Instruction in Taiwan as the Local Agent. The choice of the Local Agent is at the sole discretion of the converting Bondhokker. Regarding the conversion, please be advised of the following:

egarding the conversion, please be advised of the following: <u>Conversion Pariod</u> Subject to and upon compliance with the terms and conditions of the Bouds (the "Conditions"), the conversion right attaching to any Bond (the "Conversion Right") may be exercised, at the option of the bolder of the Bonds and to the extern provided to the Conditions, at any time op to the close of business on May 31, 2001; provided that the Conversion Right shall be suspended for one month before the ortimary shareholders meetings, for fifteen days before the extraordinary shareholders meetings and for five days before the one on which the Company determines to distribute dividends, boundess and other banefits. 1996 annual ordinary alugeholders meeting will be held on May 15, 1996. The current Conversion Price is NTS20 per share.

To exercise the Conversion Right, the Bootholder shall complete and sign a Conversion Notice (as defined in the Conditions) in the form obtainable from the specified office of any Conversion Agent together with any other documents in accordance with the Conditions. On the Conversion Date, the name of the conversion Bootholder shall be registered on the Company's shareholders' register, and the Company shall, within five days, issue ECs to the Local Agent as appointed by the converting Bootholder. The Company will file the SEC Capital increase Registration immediately after each Expiration date (the "Current Expiration Date"). The annount of the SEC Capital increase Registration shall be equivalent to the aggregate new Shares to be issued in exchange for EC's which have been converted from Bonds to the period from, and excluding, the previous Expiration Date to, but including, the Current Expiration Date, the "Conversion Period". The Company will, within 30 days after SIPA approves the Capital Increase Registration, issue stock certificates in exchange for EC's issued during the immediately preceding Conversion Period. With respect to the Conversion Notices which are received after an Expiration Date, the ECs shall be issued during the then current Conversion Period.

Account Opening Account Opening Any converting Bondholder shall consult his own Local Agent on the procedures of opening a trading brokerage account and a NT Dollar back account in the name of such converting Bondholder, including, without limitation, issuance of a power of attorney in favor of the Local Agent, in order to sell EC's or Shares converted from Bonds on the TSE.

The sale proceeds of ECs or Shares may be remitted by the Local Agent to the converting aontholder according to the ROC foreign exchange laws and regulations. The sale proceeds thereof may be reinvested by the converting Bondholder in the ROC securities market subject to certain limitations in terms of foreign ownershap lumination.

Adjustment of Conversion Price The Conversion Price will be subject to adjustment (in the tanuar set forth in the Indenture) upon the occurrence of consist

s set out in the Inden

- (i) the declaration of a dividend in, or the making of a free distribution of, Shares:
   (ii) sub-divisions, consolidations and reclassifications of Shares;
- (iii) the grant, issue or offer to the holders of Shares of rights or warrants to subscribe for or purchase Shares at less than the then Current Market Price (as defined in the Indenture) or to subscribe for or purchase any securities convertible into or exchangeable for Shares at less than the than Current Market Price;
- (iv) the distribution to the holders of Shares of evidences of indebtedness of the Company, or of share of capital stock of the Company (other than Shares) or of assets (other than regular periodic dividends in Cash) or of rights or warrants to subscribe for or purchase shares or securities (other than those mentioned in (iii) above).
- whose the for or pareness states or meanines (once and more mentioned in (all according to the state of securities (other than the Bonds, the ECs and those mentioned in (all according to the converteble atto or exchangeable for Shares at less than the Carrent Market Price or of rights or warrants (other than those mentioned in this) already in subscribe for or parchase securities convertible into or exchangeable for Shares at less than the there Carrent Market Price; and exchangeable for Shares at less than the there Carrent Market Price; and the subscribe for or parchase securities convertible into or exchangeable for Shares at less than the there Carrent Market Price; and the subscribe for or parchase securities convertible into or exchangeable for Shares at less than the there.

(vi) the issue of Shares tother than Shares or ECs on conversion of the Bonds or in any of the circu above at less than the then Current Market Price;

above a test that the Conversion Price will not be reduced below the par value of the Shares (currently NTS10 per Share) as a result of any such adjustment unless permitted in accordance with the Conditions. No Sujustment will be made where such adjustment would be less than one New Taiwan Dollar, All calculation regarding the adjustment of Conversion Price shall be made to the nearest New Taiwan dollar with half or more of a New Taiwan dollar to be considered one New Taiwan dollar. After conversion of the Bonds and pending issuance and delivery of the relevant Stores, the Company shall, within 20 days after the relevant record date, in accordance with the difference of the adjusted Conversion Price, issue additional ECs to those ECs holders listed on the shareholders' register. The Company will pay such residual portion in cash.

Denomination Amount for Conversion The Company shall only accept applications for conversion of Bonds in the denomination of US\$10,000 and integral multiples thereof. For the issume: of ECs, where there is any residual portion which is less than one Share the Company shall not pay such residual portion in cash.

Rights of EC Holders

During the period from the effective Conversion Date until the day prior to the delasting date of the EC's other than the issuance of additional EC's in accordance with lasm 6 above, and, other than the annual distribution of interest on the Boards or the distributions of dividends in accordance with lasm 9 below, the holders of EC's are entitled in enjoy the same rights and privileges as the holders of Shares.

rights and privileges as the holders of Shares. Rights Attaching to the ECs For the purposet of this liem 9 a Converting Year shall be defined as the period from, and meloding. 26th December of any year to, but excluding, December 28th of the following year. Bondbolders who convert Bonds during the period from, and including, December 28th of the previous year to the date immediately before the Company's shareholders register is closed for the annual shareholders mechang in the Converting Year, shall be excluded from receiving any interest on the Bonds accurated from 14 August of the year manchately preceding the Converting Year to the relevant Conversion Date but will receive an devidend, either an the form of Shares or cash or any other distribution in respect of the Shares (a "Dividend"), declared at the Shareholders Meeting for the immediately mending wert. ly preceding year.

mmenually preceding year. Bondholders who convert Bonds during the period from the date immediately following the annual shareholders meeting in the Converting Year to, and including. July 30 shall be excluded from receiving any merror on the Bonds accrued from August 1 of the immediately preceding Converting Year to the relevant Conversion Date and in addition shall also be excluded from receiving any Dividend declared at the shareholders meeting for the immediately preceding year. They will, however, be eligible to receive any Dividend declared in the next following yea:

Bondholders who convert Bonds during the period from August 1 of the Converting Year to, and including, December 77 of the Converting Year shall be excluded from receiving interest accrued on the Bonds from August 1 of the Converting Year to the relevant Conversion Date. In addition, the Bondholders converting the Bonds during the period decribed in this paragraph shall not be earlied to any Dividend declared for the immodiately preceding year. Converting Bondholders will, however, receive any Dividend declared in the next following year.

this paragraph shall not be entitled to any Drividend declared for the immediately preceding year. Converting Bondholders will, however, needed any Drividend declared on the next following year. If the record date fixed by the Company in any Converting Year for determining the shareholders cantled in receive any dividend or distribution for the year immediately preceding the Converting Year. In last than September 30 of the Converting Year, the Company will only issue stock certificates in exchange for EC's raise in such Certury for the same year, the Company may notify the Bondholders of its decision to issue stock certificates in exchange for EC's raise in such Certury of the same year, the of such year. If the record date is later than July 30, then the Expiration Date will be the record date. dence Inform

value each.

B 1996 optional dividend

The Annual General Meeting has approved a gross dividend of CHF 8,00 per registered share and CHF 16.00 per bearer share for the past finan-cial year. The Bound of Directors has again decided to distribute the dividend for the 1995 financial year in the form of an optional dividence ("1996 optional dividend"). Existing shareholders may elect to receive a corresponding number of new registered shares in place of the net di-vidend of CHF 10.40 or CHF 5.20. The shares so obtained will also carry 5 Warranto for subscription to further securities. Regardless of the dec-sion taken (drawing the dividend in the form of registered shares or cuch), the withholding tax (35%) can be reclaimed by receptoris satisfyno the requirements of the law.

The 1996 optional dividend will be allocated to holders of shares ranking for dividend as of May 13, 1996 (ex-rights date) as follows:

2 1995 optional dividends for each existing bearer share of CHF 100 par volue

1 1995 optional dividend for each existing registered share of CHF 50 DEF VELLE

May 13 to May 22, 1996, 12:00.

First option: Subscription for new registered sha

41 1996 optional dividends entitle the holder to subscribe for 1 new registioned share of CHF 50 par value. Each new registered share is com-bined with 5 Warrants to acquire additional registered shares (see Warrant conditions below

CHF 213.20 total for each new registered share of CHF 50 par value.

Payment takes place with value date May 26, 1996, by means of a set-off with the number of 1996 optional dividends required for subscription for the new shares.

10 Warrants entitle the holder at any time during the exercise period from May 29, 1996 up to and including June 30, 2000, 12:00, to purchase one new registered share at the price of CHF 250.00 total for Bach reactered share.

Warrants evidencing subscription rights are being leaved to share-holders in the United States of America who elect to receive the optional dwidend in the form of shares and subscription rights, but the shares purchasable on exercise of these Warrants are not being offered in the Unned States. Such Warrants may be traded during their are but they may not be exercised by persons in the United States.

#### and option: Cash dividend

CHF 5.20 per 1995 optional dividend. This corresponds to a net dividend of CHF 10.40 for each existing bears share and CHF 5.20 for each existing registered share. The cash dividend will be paid as from May 28, 1996.

# Sniping over the share slugs starts up again

Norma Cohen on the row over pre-emption rights which give first refusal to existing shareholders

A time-honoured method for raising new equity capital in Britain - pre-emption rights has long been the subject of skirmishes between companies and institutional investors.

The sniping has started again - hut this time there are signs that the two sides are prepared to come out of their hunkers aud countenance change.

Pre-emptioo rights give a company's existing sharehold-ers the right of first refusal when a new slug of that company's shares come to market. Companies have often grum-

bled that the system raises their cost of capital. Last week they turned the heat up when the Confedera-

tion of British Industry said it wanted to open talks with institutional shareholders about making the system more flexible.

Some of Britain's leading institutions have begun to acknowledge that there is merit in some of the companies' complaints - although they insist that the general principle of pre-emption (which is enshrined in company law) must remain,

institutions have insisted that any company wanting to issue shares worth more than five per cent of its existing capital must first offer those share to existing investors in proportion to their current holding. The CBI companies commit-

tee argues that the five per cent ceiling should be lifted to. say, 25 per cent. It points out that this would hring the system in line with Stock Exchange guidelines which say that a company may issue, without shareholder approval, new equity worth up to 25 per cent of its outstanding capital

The institutions, for their part, say the debate about the merits of pre-emptive rights has been wrongly confused with a separate issue - the practical way in which those

rights are honored. "We believe that pre-emption rights are a fundamental pro-tection for shareholders as fund manager put it: "Why should we object to being owners of a company, providing protection against involuntary dilution [of their stake in given something for nothing?".

## **Maurice Dwek** returns to the financial fray

Mr Maurice Dwek, (below), once the scourge of the Swiss hond market cartel with his Soditic investment bank, is to ride again with a oew set of partners, writes George Graham. Mr Dwek founded the original

Soditic in Geneva in 1971, but kept rights to the name when it was taken over in 1990 by S.G. Warburg. When Warburg became part of Swiss Bank Corporation last year the original investment banking husiness in Geneva, and most of its 80 employees, ecame redundant. Half a dozen disgruntled former

executives from Warburg approached Mr Dwek with the idea of a new venture. Now 64, Mr Dwek. who is chairman of the new group. says he plans to leave the day to day work to his younger partners.

The new-look Soditic, however, has no intention of returning to its old pastures. In the 1970s, the group made a dent in the Swiss market with innovations such as the first dual currency bond and the first interest rate swap, as well as with the development of a market for high yield bonds from issuers like Heron Corp and Polly Peck.

At one point it was Switzerland's fourth largest issuing house.

In its new guise, Soditic has no plans to get back into bond issues. Instead. the group will develop niches in trade finance, loan syndication, leasing, merger advice and some equity dealing and placemeots. Mr Dwek is joined hy Mr Francis

Stobart, Mr Didier Benaroya, a former Paine Webber managing director and co-founder of The Transportation Croup; Mr Luigi de Carlo, former head of European equity trading for Warburg; Mr Dominic Dreyfus, a loan syndication and trade finance specialist who joined the old-style Soditic in 1983: Mr Mark Katzenellenbogen, a Warhurg corporate financier who will take Soditic into the South African market: and Mr Marco Dwek, an equity sale specialist who also happens to be Maurice's nephew.

## Business as usual

at Crédit Lyonnais Mr Marc Poli hopes this week will be back to "business as usual," writes David Owen. Crédit Lyonnais' director of interest rate and currency markets intends to have his full complement of 160 employees hard at work - albeit in unfamiliar surroundings.

history graduate, worked through the night last Sunday getting the French bank's hack-up dealing room up and running, following the fire at the bank's Paris headquarters which

destroyed his office and rendered its main dealing room unusable. By Tuesday, back-up premises on the fringes of Paris at Levallois-Perret were a hive of activity with dealers conducting business from 50 workstations. Another 50 were on

FACES

stream hy Friday morning. Mr Poli started in 1972 as a price forecaster with the coffee company Jacques Vabre, moving to Total, the oil group, after a year. He subsequently worked for Banque Worms and then Crédit Agricole, which he left in 1994

to join Crédit Lyonnais. A golf fan and avid science fiction reader, one of his regrets about the frenetic activity of the past week is that it has made it difficult for him to stick to his target of reading a book a day - "just to remain creative".

## Plain sailing for Bo Goranson

Mr Bo Goranson, the Swedish chairman of Europe's largest debt collection agency, intrum Justitia, appears unfazed by reports that Provident Financial, the consum credit group, may be about to bid for the company, writes Jane Martinson. Speculation has centred on the 19 per cent of Intrum's stock held hy MAL the media and financial services group

if one came along – any prospective buyer would have to reckon first with Mr Goranson. He owns 31 per cent of intrum, and is not about to let go: "I have a very nice time here... I prefer to stay on," he says, firmly. Intrum, founded by his father in 1923

23

and based in Amsterdam, has a London listing and operates in 15 European countries. Last year the company turned in a 13 per cent rise in pre-tax profits, to £15.6m.

The debt collection business supports an enviable lifestyle. A keen sailor who three years ago sponsored an entry in the Whitbread round the world yacht race, the 57 year old Mr Goranson spends only a quarter of his time with the company. The rest is chiefly spent horse riding and entertaining guests on his boat. He says he is ready to fight for his inheritance. Nonetheless.potential hidders have doubtless noticed that neither of Mr Goranson's two children has any interest in the husiness.

## Patil shakes up the Indian exchanges

For a man who might otherwise be quietly looking forward to the distinguished sunset of a public sector career in indian finance, R.H Patil. managing director of the two-year-old National Stock Exchange, finds himself with his hands full, writes Mark Nicholson. "I felt I should do something entrepreneurial rather than just retire as a bank official," says the 58-year-old Patil.

Thus in 1993 he left the industrial Development Bank of India, the country's higgest state-owned lender to industry, to set up the NSE -consciously designed by the indian government to become shake up the country's clubby and inefficient equity markets in advance of India's opening to international portfolio investment. And so it has proved. in just two years of trading, the NSE last month was reporting an average daily turnover of Rs9bn (\$260m), three times the average of the Bombay Stock Exchange, previously the country's pre-eminent bourse. Within months the NSE aims to introduce India's first automated share depository and, hefore that, will introduce the country's first settlement guarantee scheme, underwriting counterparty and settlement risks.

Patil says more innovations will follow. In the next year the NSE aims to introdoce india's first fotures trading, develop a debt market and eventually bond futures and forex-related instruments. "We want to make it into a department store everything under one roof," he says.

fortis AMEU

which last month merged with United News & Media, But even if MAI was ready to sell - and the company will only say that it would look at an offer

# The puzzle of Nordic bond yields

machanism, the ERM. The decision encapsulates the complexities of the ontlook for Scandinavian securities in the period up to and after the scheduled date for European monetary union, January 1 1999. The markets bave become

more certain that Emu will happen on time, at least for France and Germany - as shown by the move of French bond yields below those of bunds. But for the Scandinavian countries, the outlook for Emu is more uncertain and yields remain clearly above those of bunds, as the chart shows. A conference last week

COMPANY RESULTS DUE

in Copenhagen organised by Unibank, one of Denmark's two big banks, threw some light on the issue. There are political and economic complexities. The Nor-

dic countries span the range of possible conditions. Norway is not a member of the EU but would qualify for Emu if it were. Denmark bas been a member of the EU for years and would probably qualify for Emu but has chosen to opt out. Sweden is divided on the wisdom of joining Emu, and is unlikely to qualify to join in 1999. Finland is keen on Emu and stands a chance of qualifying - but may not make it. The fact that Emu member-

ship is an option for these countries is itself remarkable, in balance and a testimony to the sea-change in the region's political economy in the past decade. They have almost all made great strides in reducing gov-ernment deficits, stabilising

their currencies, and acquiring monetary discipline. They have done so, in many cases, against a deeply unpromising background: high industrial cost structures, unsustainable welfare burdens, and (in the case of Finland) the collapse of the Soviet Union, once an important export market Officials from all the region's

finance ministries and central banks now talk the language of uncompromising fiscal orthodoxy. Even Sweden promises to reduce its budget deficit from 12 per cent of GDP in 1993 to 2.7 per cent in 1997, the year in which Maastricht says it must be below 3 per cent to quality for Emu. By 1998, Sweden claims, the budget will be The yield spread over bunds suggests the market believes Sweden's convergence will be slower than that. Even if eco-

nomic recovery produced a rapid drop in the budget deficit

to post first-quarter net profit

after minorities of Pta34.4bn

Pta35.6bn (\$278m), up from

and the government debt criterion were interpreted loosely enough to allow Sweden to qualify for Emu in 1999, it is still not clear whether it would be among the first antrants. This is where the political

factor comes into play. The EU is not popular in Sweden. Only 20 per cent of voters favour Emu entry, while nearly 50 per cent are opposed. This colours the debate over whether Swe den should re-enter the ERM, in order to achieve the two years of membership which the Maastricht treaty requires for Emu participation.

If Sweden does not enter the ERM, it would be harder for Finland - beavily dependent on trade with its larger neighour - to do so. Finnish officials say they are undecided as to whether to join the ERM. ERM entry is uncontroversial in Finland, where full participation in every aspect of the EU is seen as a national strate-

ic necessity. If Finland does decide to join the ERM, it would prefer to re-enter alongside Sweden, but officials say they will not allow this consideration to be the deciding ooe.

Where does all this leave the financial markets? The sharp fall in yield spreads in recen res: FT Exter years reflects the marked

improvement in inflation and in those countries seen as likely entry candidates will converge more rapidly with government finances in the region. The Maastricht effect has already been at work, by giving governments clear benchmarks at which to aim. If those of Germany and France. Finland's political commitment to the EU is likely to ensure that it falls into this there is to be a "narrow" Emu in 1999. as the markets currently seem to expect, none of category. Perceptions of the the Nordic economies will be likelihood of entry for Sweden will involve calculations of the political appetite for further members of the first wave, and bond yields will primarily reflect individual countries' budget austerity and for Emu progress in ecocomic and fiscal membership. in order to attend or be represented at the meeting, holders of bonds must deposit, at least five clear days prior to the meeting at the head office, the cenificate of deposit, issued by the bank, financial institution or stockbroker with whom the bonds are lodged.

If the guorum of this General Meeting is not present, the meeting will be adjourned until Wednesday, the 12th of June 1995, at 10.00 a.m. at the same place.

THE BOARD OF DIRECTORS

equity market has enjoyed an unprecedentedly positive run so far this year, largely thanks to the high levels of liquidity in institutional portfolios which need to be invested and to the wide selection of issues on offer to soak it up.

But bankers are starting to worry that such favourable conditions may not last long enough to get the pre-summer pipeline of issues sway. They note for example that the Asian primary equity market is becoming difficult and that banks with five or six mandates to execute in the region before the summer are unlikely to get them all done. For now, the backdrop for European equity offerings remains positive. Attractive price-earnings multiples in European stock markets, which are below those in the US, and the low interest-rate environment are continuing to eocourage US institutions to divert funds from domestic equities to European offerings.

٠,

have also changed the way investors respond to offerings. Last year, when they had the upper hand, many, particularly in the US, delayed placing orders in the bope the price manufacturer, the offering has been beloed by a strong share range would be revised down-

wards. But this year, investors have been been quick to place their orders, often inflated for fears of being scaled back, to lower their cash positions. Such promptness to snap up shares has resulted in offerings being significantly over-subscribed. For example, two offerings launched last week - the flota-tion of Mediolanum, one of ltaly's leading non-bank providers and distributors of insurance and mutual fund products, and the Freoch government's sale of its stake in Assurances Générales de France - are already believed to be over-subscribed.

Other offeriogs bave also attracted considerable interest. In the UK, the privatisatioo of Railtrack, due to be priced this

## MARKETS: This Week

## NEW YORK By Maggie Uny

US stock and bond markets ended last week on a strong note, after some volatility. Friday's gains were largely doe to the benign producer prices figure, which showed a rise in April of 0.4 per cent. The core figure, including food and eoergy, rose 0.1 per cent. The markets took the figures to mean there was little in the way of inflationary pressures in the pipeline.

10 3 5 96

However, markets will look closely at the Consumer Price Index, due out tomorrow. According to MMS

International, the consensus forecast is for a rise of 0.4 per ceot in April, or 0.3 per cent excluding food and energy. Other economic news in

recent days has been pointing to a continuation of the first quarter's stronger growth rate. This is not encouraging for markets, which are concerned that faster economic growth could come up against labour market tightness and high levels of capacity utilisation, which would feed inflation and could persuade the authorities

to tighten monetary policy. This week's other economic statistics will, therefore, be scrutinised for signs of coming overbeating. Retail sales figures for April, also due tomorrow, are expected to show spending in the shops is continuing to rise. The median forecast is for ex-car sales to have risen 0.3 per cent.

Source FT Extel On Wednesday, industrial production shoold be seen to have bounced back in April after the General Motors stoppage in March. Estimates are for a rise of 0.5 per cent, although Salomon Brothers is expecting a rise of 0.7 per ceot. Forecasts for capacity ntilisation levels in April

centre on 82.7 per cent, up

from 82.5 per cent in March.

Housing starts for April are

likely to show a rebound, says

Salomon, despite the effect of

higher long-term bond yields

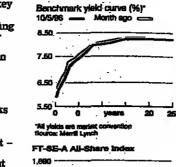

monetary policy will still be required". Last week's US producer price figures gave some relief to those worried about inflationary pressures, hut rising commodity prices may yet give international bond

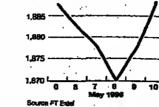

markets some nasty moments. Gilt investors may also worry about home-grown signs of inflation, in particular the

average earnings oumbers on Wednesday - wages are a much more important component of corporate costs than commodities. UK equities pulled themselves out of their recent

slump late last week, with the belp of a US rally and some stronger than expected oumbers from Shell. The FT-SE 100 index appears to be atuck in a 3,650-3,850 range, with bid bopes and dividend growth providing support at

LONDON By Philip Coggan

the bottom and political worries and high gilt yields putting a cap on the rise. The market will get a clearer picture about the prospects for earnings growth in 1996 from results this week from corporate giants such as Allied Domecq, Argyll, British Gas, British Telecom, Commercial Union, Grand Met and Hanson There have been a few profits warnings this year but to date, none has caused any general market alarm: bad news from any of the above might do the trick.

FRANKFURT By Andrew Fisher

Az yiekis anı market d Source: Mentil Lynch DAX Index price data in the US heartened tha market late on Friday and 2,480 the DAX index just failed to 2.475 move through the 2,500 mark again after hours. Mr Thomas Holmes of 2.470 2,465 Schröder Münchmeyer Hengst the Frankfurt bank, said: 2,460 "Buyers of German shares are,

by all appearances, far from enthralled." Volumes have drifted lower - one newspape said traders described Friday's business as "yawn-making" and domestic institutions are holding back. Mr Holmes said foreign clients were also more reserved. "Our foreign institutional clients have taken slightly more money out of the market than they have put in." be said, referring to the past two months. The market was driven more by companies'

### **HONG KONG**

Today's Sino-US trade talks, together with inflation figures from the US, are likely to bold the key to this week's trade.

Sentiment was weak last week ahead of today's copy-right protection talks between the US and China. The talks are followed by Wednesday's deadline for threatened US sanctiona against a list of imports from China worth around \$2bn.

Beijing has vowed to retaliate with even greater severity, but most investors expect to see another of the last-minute compromises typical of the two countries' trade relations.

INTERNATIONAL BONDS By Conner Middelmann

Getting the message on Budapest **Rating agency** views converge on Although the BSE is older than its counterparts in Warsaw and Prague, it remains tiny by international standards outlook for Italy and turnover and liquidity are relatively low, with most inter-est focused on a handful of

> S&P's senior analyst for Italy. If tha world's two leading rating agencies were asked to compare Italy with a glass of Chianti wine, Moody's would probably say it's half full while Standard & Poor's would call it half empty. And both would have a point. For while many factors - the learer political picture follow-

inflation: slowing growth; and a strengthened currency poised to re-enter the European exchange-rate mecbanism are supportive factors, its fiscal outlook continuea to cast a hadow over Italy's improving

"We don't believe the election results in and of themselves leave us with any greater degree of certainty about the prospects for achieving a fiscal adjustment over the medium term," be said, describing pub-lic finance as the "Achilles

beel" of Italy's credit rating. This statement appeared to contrast with Moody's announcement a week earlier that it was placing its rating for Italy on review for possible upgrade after the elections. Moody's move triggered a rally in Italian government bonds which led to a reduction in their yield spreads over German bunds, while S&P's state ments saw a partial retracement of the market's gains reinforced by weakness in other high-yielding markets. Italy's 10-year government bond yielded 346 basis points over its German counterpart

on Friday, compared with 336 points a week earlier. However, on closer examination, the two agencies' statements mark a convergence of views rather than contrasting opinions, since Moody's rating for Italy stands two notches below S&P's at A1 and an upgrade would merely bring it into line with S&P.

"They're both focusing on the same problems - only they are coming from different starting points," said Mr Jose Luisa Alzola, an economist who covers southern Europe at Salomon Brothers.

Nevertheless, the dehate highlights the risks and opportunities of Investing in Italian bonds. "This is not to say the bullish story is over, but people have become more realistic." said Mr Luca Jellinek, bond strategist at Paribas Capifalls in inflation. tal Markets.

Many observers are cautious as to Italy's ability to continue

kers also expect a secondary offering of Mol, the state oil and gas company and tha BSE's largest stock, in the second half. In addition, Cofinec, a regional packaging group set up by Mr Carlo De Benedetti, the Italian industrialist, is planning a \$75m-\$100m IPO and is expected to become the first non-Hungarian company to list on the BSE. However, these are among the few large offerings known to be under preparation and

ket's lack of products. "The recent privatisations and listings have attracted strong interest," says Ms Cloud. "But there are still only six or seven companies with a capitalisation of \$100m or more, which is the lower limit for some fund managers."

pared with Ft351m last year. The government has sought to boost the local capital markets by selling stakes in large state companies to financial investors and listing them on the BSE. Previonsly, most Hungarlan privatisation involved selling companies to strategic partners. This strategy has paid off and newly privatised compa-nies such as Richter Gedeon and Egis, Hungary's two biggest pharmacenticals produc ers which together make np around 30 per cent of the BUX

This prompted S&P to con-firm last week that it is keeping Italy's AA foreign debt rat ing on negative outlook, where it was placed in February 1995. In a teleconference last Thursday, S&P highlighted uncertainty over the speed of Italy's fiscal progress, and said the April 21 election results have

done little to change this. "While the electoral platform of the incoming centre-left is committed to fiscal change, it still remains to be seen to what extent it can obtain parliamentary support on an issue-by-

## POLIET. AGREEMENT BETWEEN PARIBAS AND SAINT-GOBAIN

Paribas Affaires Industrielles, owner of 56.6 % of the share capital of Poliet, and Saint-Gobain have reached an agreement under which Saint-Gobain should gradually take the majority control of Poliet's share capital.

Under the terms of the agreement :

- in a first phase, Saint-Gobain will acquire a block of 4.7 % of Poliet's capital at a price of FRF 555 per share (exdividend for the year 1995) and FRF 555 per bond redeemable by way of a share (« ORA »),
- in a second phase, the opportunity to purchase or sell at a later date, at the initiative of either party, the remaining holdings of Paribas in a several stages between 1997 and 1999, through sale and purchase oppons that Paribas and Saint-Gobain have mutually granted to each other at a price of FRF 565 (1997 options) and FRF 575 per share (1998 and 1999 options).

The application of this agreement is subject to the fulfillment of suspensive conditions, notably the authorization of the European Union Commission in respect of competition.

On completion of the first phase, in agreement with Paribas, Saint-Gobain will take control of the management of the Poliet Group.

In view of the nature of the deal, Poliet's minority shareholders will be given the opportunity to sell their shares to Saint-Gobain under the same conditions as Paribas: FRF 555 per share (ex-dividend for the year 1995) and FRF 555 per bond redeemable by way of a share (« ORA »). Paribas Affaires Industrielles was at the origin of the creation

and the development of the Poliet Group as it is today, having accompanied and backed it for about 30 years. Panbas has been the main shareholder. During this penod Poliet has developed strongly, both in terms of sales and profits. Poliet, which employs around 20,000 people, has sales of FRF 23 billion in the distribution and manufacturing of building materials and home products. It has leading positions in France, where it is very well known through Point P + and - Lapevre - Poliet's net income for 1995 amounied to FRF 752 million.

**GROUPE PARIBAS** 

Poliet has recently grown in several European markets, which aircaov account for 18% of sales of its industrial activities.

The expected transaction will enable Saint-Gobain to achieve a significant new step in its development, which is coherent and consistent with its strategy. Saint-Gobain, which is already present in the building materials sector particularly in North and South Amenca, strengthens its French and European position in turning towards the more stable renovation market which has regular growth. It completes its existing distribution activities with a new specialized distribution network which is focused on a wide-ranging customer base of contractors and individuals with strong growth potential.

The backing of Saint-Gobain, both nationally and internationally, will sustain and accelerate the development of Pohet in the future.

                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     | May                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        |
